### SOCIEDAD DE TRANSMISIÓN AUSTRAL S.A. AND SUBSIDIARIES Notes to the Consolidated Interim Financial Statements

As of June 30, 2022 (unaudited) and December 31, 2021 (Proforma) (In thousands of Chilean pesos – ThCLP\$)

#### 1 Information and business description

#### a) General Information

At the Extraordinary Shareholders' Meeting of Sociedad Austral de Electricidad S.A., hereinafter "SAESA", held on December 18, 2019, it was agreed to divide it into the legal successor, which maintained the same corporate name and a new company, named "Sociedad de Transmisión Austral S.A.", hereinafter "STA" or the Company. The shares held by SAESA in STN, SATT and SGA were assigned to the latter as a result of the division. The division took effect as of December 31, 2019. The purpose of the division is to carry out certain separations of the electricity distribution segment, which is consistent with the regulatory guidelines that will be implemented in the coming years and to seek operational efficiencies, financial and accounting, by bringing together – to a significant extent – companies whose functional currency is the US dollar.

On June 1, 2021, the Company Inversiones Los Lagos IV Limitada merged with the Company (both at the aforementioned date indirect subsidiaries of Inversiones Eléctricas del Sur S.A), with STA being the legal successor. As a result, Sagesa S.A. and Línea de Transmisión Cabo Leones S.A. become direct subsidiaries of STA, and Sistema de Transmisión del Centro S.A. (STC) becomes a STA related with 49,9% of ownership.

Likewise, on the same date, STA entered into a contract for the sale of shares with the related company Sistema de Transmisión del Sur S.A. (Old STS), where the last sold, and transferred 50,000 shares over its subsidiary STC. Considering the merger mentioned in the previous paragraph where STA remains a 49,9 % ownership in STC plus the purchase of these shares, the Company became a Controller of STC with a 99,9% ownership (99.990 shares).

On July 9, 2021, the Company entered into a contract for the sale of shares with Acciona Energía Global S.L., sole and exclusive owner of 100% of the shares issued by Tolchén Transmisión SpA (Tolchén), acquiring the total shares (196.685.064 shares) in US\$ 35.9 million, Of which US\$ 3.7 million corresponds to Tolchen's shares and US\$ 32.2 million to the Intercompany debt that Tolchen held with its Parent company.

On December 28, 2021, in the context of the reorganization process that the SAESA Group companies are carrying out as a result of the enactment of Law No. 21.194 that modified the General Electric Services Law, the company carried out a capital increase through the exclusive issuance of new Series B shares. Said capital increase was subscribed and paid by Inversiones Eléctricas del Sur S.A. through the total contribution of the shares owned by Sistema de Transmisión del Sur S.A. (New STS). The process began on March 29, 2021, when the Extraordinary Shareholders Meeting of the related company "STS" agreed to merge Frontel Transmisión S.A. and Sistema de Transmisión del Sur S.A. into "New STS".

Such merger would be subject to the fulfillment of a series of suspensive conditions, among which the inscription of Saesa Transmisión S.A. in the Securities Registry kept by the Chilean Security and Exchange Commission, since it would absorb STS, the issuer of bonds in the local market, for which it must be registered in the Register. The registration in the Securities Registry was carried out on 17 November 2021. With the suspension conditions fulfilled, the merger took effect from December 1, 2021.

By virtue of the above, on December 1, 2021, the subsidiary New STS has become the successor and legal continuer of the companies Frontel Transmisión S.A. and Sistema de Transmisión del Sur S.A. ("Old STS"), with both companies dissolved in full right without the need to carry out its liquidation, everything in accordance with Article 99 of Law No 18.046 and Article 158 of the Regulations on Public Companies. In addition to the effectiveness of the merger, dated December 1, 2021, Saesa Transmisión S.A. has become known as the "Sistema de Transmisión del Sur S.A.". (New STS), maintaining its unique Tax ID number 77.312.201-6, and registration in the Securities Register under number 1200. Hereinafter also referred to as "STS".

With this, the transfer of the shares of New STS from Eléctricas to STA was 10,078,417,668.726 shares distributed in 416,201,830 Series A shares and 10,078,001,466.896 Series B shares. As of December 31, 2021, the Company became the Controller of New STS with a total of 99,8 % ownership.

The subsidiary company registered in the Register of Reporting Entities is Sociedad Austral de Transmisión Troncal S.A., SATT, registered under number 435.

The non-registered subsidiary companies are Sociedad Generadora Austral S.A., SGA, Sistema de Transmisión del Norte S.A., STN (in process of registration), Sistema de Transmisión del Centro S.A., STC, SAGESA S.A., Línea de Transmisión Cabo Leones S.A. and Tolchén Transmisión SpA.

The Company is a direct subsidiary of Inversiones Eléctricas del Sur S.A. This is the company through the Canadian fund Ontario Teachers' Pension Plan Board and the Canadian fund Alberta Investment Management Corporation (AIMCo) control Saesa Group companies and which the Company is a part.

The legal address of the Company is Isidora Goyenechea 3621, floor 3, Santiago, and the main commercial address is Bulnes 441, Osorno.

#### b) Business information

The object of the Company is to carry out business related mainly to the transmission of energy through its own or other companies, as well as to carry out and manage investments. The Company's activities that make up its corporate purpose may be carried out in the country or abroad. The Company currently manages the investments of its subsidiaries STN, SATT, STC, Tolchén, STS, SGA and SAGESA.

The subsidiary STN, whose main purpose is the construction, operation and maintenance of transmission or energy transmission facilities, operates a dedicated transmission system in the Antofagasta Region, whose purpose is to supply the energy and power requirements of a mining company and allow the connection of a generating plant (517 MW) to the National Electric System (SEN).

The Subsidiary SATT whose main turn is the construction, operation, maintenance and management of electric power transmission or transport facilities operates Dedicated Transmission, Zonal and National assets located in Copiapó, Tocopilla and La Araucanía.

The subsidiary Tolchen has a dedicated 33 km long dual-circuit transmission line with a capacity of 233 MVA per circuit and are used by wind farms.

The first circuit runs from the San Gabriel substation to the Mulchén substation, and the second circuit runs from the Tolpán Sur substation to the Mulchén substation. Both circuits are located in the cities of Renaico and Mulchén, provinces of Malleco and Bio Bio, belonging to the regions of Araucanía and Bio Bio respectively.

The subsidiary New STS develops mainly transmission business in the Bío Bío, Araucanía, Los Ríos, and Los Lagos regions; and also rendering services in all the special areas of expertise related to the electrical transportation and transformation systems, such as advisories in designing, building, maintaining, and operating the systems.

The subsidiary SGA markets electric power on the CEN-SEN spot market and its revenues relate to the sale of energy and power on the CEN-SEN spot market.

The subsidiary SAGESA S.A. has generation assets operating from the Bio Bio Region to the Los Lagos Region and its revenues correspond to the sale of energy and power on the CEN-SEN spot market.

The indirect subsidiary Cabo Leones, also in the Dedicated Transmission System, corresponds to a double circuit line of 220 KV, located in the communes of Freirina and Vallenar, which aims to evacuate the electricity and power of up to three wind projects under construction. it entered into operation in December 2017.

In the context of the reorganization process that the SAESA Group companies are carrying out as a result of the enactment of Law No. 21.194 that modified the General Law of Electric Services, establishing a legal obligation of exclusive business for energy distribution companies electrical. At the Group level, the following actions have been carried out since 2019 onwards, with the objective of complying with the legal obligation of exclusive business.

- In December 2019, the division of SAESA into two companies was agreed, one of them the legal successor, which maintained the corporate name, electricity distribution and a new company, called "Sociedad de Transmisión Austral S.A." (STA). The shares held by SAESA in STN, SATT and SGA were assigned to the latter as a result of the division.
- In May 2020, STA merged with another subsidiary of the group, Los Lagos IV (owner of Saesa and Cabo Leones) and, on the other hand, Sistema de Transmisión del Sur S.A. sold its shareholding in the company Sistema de Transmisión del Centro S.A. to STA.
- In December 2020, the division of Saesa and Frontel was agreed, keeping Saesa as successor and creating Saesa Transmisión S.A., and on the other hand, keeping Frontel as successor and creating Frontel Transmisión S.A. The companies resulting from each division will operate the transmission assets. In the case of the division of Saesa, within the transfer of assets leaving the Company, the participation in the direct subsidiary Sistema de Transmisión del Sur S.A. was included. whose main turn is the transmission.
- On December 1, 2021, the merger was materialized by incorporation of Frontel Transmission S.A. and Transmission Systems of the South S.A. in Saesa Transmission S.A., on the same date, Saesa Transmission S.A. has been renamed "Sistema de Transmission del Sur S.A." (New STS).
- On December 28, 2021, the Company carried out a capital increase through the exclusive issuance
  of new Series B shares. Said capital increase was subscribed and paid by Inversiones Eléctricas del
  Sur S.A. through the total contribution of the shares owned by Sistema de Transmisión del Sur S.A.
  (New STS).

All the actions mentioned above had the purpose of grouping all the transmission companies of the Saesa Group as direct subsidiaries of STA, which meant that within the restructuring process it was necessary to temporarily include the SGA and Saesa companies that have the lines of distribution and Generation respectively.

On September 27, 2021, the Company began an international bond placement process under rule 144A/REG-S in order to refinance all the intercompany debt held by the transmission companies and obtain financing for new projects. Considering the market conditions and the type of risk of the transmission business, the placement of this bond will be destined only to finance the transmission subsidiaries of STA, excluding the commercialization and generation businesses of SGA and SAGESA, which have not yet been divested.

According to the above, at the time of the placement of the Bond there was a formal commitment with the potential bondholders, where STA will divest itself of the subsidiaries SGA and Sagesa through a new restructuring process planned for the period 2022, It is for this reason that both subsidiaries have been reclassified and presented within the group of assets and liabilities held for distribution to owners as detailed in note 13.

#### 2 Summary of significant Accounting Policies

#### 2.1 Accounting principles

These Consolidated Interim Financial Statements are presented in thousands of Chilean pesos, and they were prepared based on the accounting records kept by the Company and its Subsidiaries. The principles and criteria have been consistently applied by all the subsidiaries.

The accompanying Consolidated Interim Financial Statements of the Company and its subsidiaries ended as of Thursday, June 30, 2022, and December 31, 2021, have been prepared in accordance with International Financial Reporting Standards (hereinafter "IFRS") issued by the International Accounting Standards Board (hereinafter "IASB"). For these purposes, the IFRS comprise standards issued by the International Accounting Standards Board "IASB" in English) and the interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

These Interim Consolidated Financial Statements have been approved by its Board of Directors at its meeting held on August 31, 2022.

#### 2.2 Responsibility for the information and estimates made

The Company's Management is responsible for the information contained in these Consolidated Interim Financial Statements.

The preparation of the accompanying Consolidated Interim Financial Statements requires the use of certain estimates and assumptions by Management. These estimates are based on management's best knowledge of the reported amounts, events or shares as of the date of issuance of these Consolidated Interim Financial Statements. However, it is possible that events in the future may require them to be adjusted (upwards or downwards) in future periods, which would be done, in accordance with IAS 8, on a prospective basis, recognizing the effects of the change in Future Consolidated Interim Financial Statements. The details of the significant accounting estimates and policies is shown in Note 5.

#### 2.3 Reporting period

In view of Note 1, which states on December 28, 2021, the Company made a capital increase through the exclusive issuance of new Series B shares, that it was subscribed and paid for by Inversiones Eléctricas del Sur S.A. through the total contribution of the shares that it owned of Sistema de Transmisión del Sur S.A. (New STS). It implies that the present Consolidated Interim Financial Statements consider their presentation as if the merger had occurred as of January 01, 2021, for comparative purposes.

Consequently, the following criteria are followed in its elaboration:

- For the period from January 1, 2021, to December 28, 2021, the criteria of maintaining the accumulated equity of the new company entering the consolidation perimeter (New STS) is followed. As of December 31, 2021, the Company presents real values emanating from the transmission operation of the New STS. Therefore, these consolidated interim financial statements include the following:
  - Interim Consolidated Statements of Financial Position, classified as of June 30, 2022, and December 31, 2021.
  - Interim Consolidated statements of comprehensive income by nature for the periods ended June 30, 2022, and 2021.
  - Consolidated Interim Statements of Changes in Equity for the periods ended June 30, 2022, and 2021.
  - Interim Consolidated statements of cash flows, direct method, for the periods ended June 30, 2022, and 2021.
- For the period from January 1, 2021, to June 30, 2021, Proforma Interim Consolidated Financial Statements are presented, following the criterion of maintaining the added equity of the new company STS. Therefore, these consolidated interim financial statements include the following:
  - Consolidated statement of financial position classified as of December 31, 2021 (Proforma).
  - Statement of comprehensive income by nature for the period ended December 31, 2021 (Proforma).
  - Statement of changes in net equity for the period ended December 31, 2021 (Proforma).
  - Statement of cash flows, direct method, for the period ended December 31, 2021 (Proforma).
- The proforma equity of the company Sistema de Transmisión del Sur S.A. (Ex Saesa Transmisión S.A.) as of January 1, 2021, which was incorporated as a subsidiary of STA as a result of the payment of the capital increase made by Inversiones Eléctricas S.A. through the contribution of its shares in New STS in the amount of ThCLP\$231,726,952.

#### 2.4 Basis of preparation

The Consolidated Interim Financial Statements have been prepared under the historical cost criteria, except in the case of financial instruments, recorded at fair value.

#### 2.5 Basis for consolidation

The Consolidated Interim Financial Statements incorporate the Financial Statements of the Company and the entities controlled by the Company (its subsidiaries). Control is achieved when the Company has:

- (a) power over investment (i.e., existing rights that give the ability to direct the relevant activities of the investee, i.e., activities that significantly affect the returns of the investee).
- (b) exposure, or rights, to variable returns from its involvement with the investee; and
- (c) ability to use its power over the investee in order to affect its performances.

Where the Company has less than most of the voting shares in an investee, it has nonetheless power over the investee when its voting shares are sufficient to give it in practice the ability to direct unilaterally the investee's relevant activities. The Company considers all facts and circumstances to assess whether the voting rights in an investee are enough to give it the power, including:

- (a) the number of voting rights that keeps the investor in relation to the number and dispersion of the ones that maintain other holders of voting.
- (b) potential voting rights held by the investor, other vote holders or other parties.
- (c) rights arising from other contractual arrangements; and
- (d) any additional facts and circumstances indicating that the investor has or does not have, the current ability to direct the relevant activities at the time these decisions need to be taken, including patterns of voting behavior in previous shareholders meetings.

The Company will reassess whether it has control over an investee if facts and circumstances indicate that there have been changes in one or more of the three control elements mentioned above.

The consolidation of a subsidiary starts from the date the investor obtains control of the investee and will cease when it loses control over it. Specifically, the income and expenses of an acquired or sold subsidiary during the year are included in the Consolidated Statement of Comprehensive Income from the date on which the Company obtains control until the date on which the Company ceases to control the subsidiary.

Gain or loss of each component of other comprehensive income is attributed to owners of the Company and the non-controlling interest, as applicable. Total comprehensive income is attributed to owners of the Company and non-controlling interests, even if the result of the non-controlling interests has a deficit balance.

If a subsidiary uses accounting policies other than those adopted in the Consolidated Interim Financial Statements for transactions and other similar events under similar circumstances, appropriate adjustments will be made in the Financial Statements of the subsidiaries in preparing the Consolidated Interim Financial Statements to ensure compliance with accounting policies of the Company.

All assets and liabilities, equity, revenues, expenses, and cash flows relating to transactions between group companies are eliminated in consolidation.

The detail of the subsidiary companies, which have been consolidated in these Consolidated Interim Financial Statements, is as follows:

|              |   |                  |         |                     | Ownership Interest % |            |           | %          |  |  |
|--------------|---|------------------|---------|---------------------|----------------------|------------|-----------|------------|--|--|
| Taxpayer ID  | Company name                                  | Abbreviated name | Country | Functional currency |                      | 06-30-2022 |           | 12-31-2021 |  |  |
|              |   | Hame             |         |                     | Direct               | Indirect   | Total     | Total      |  |  |
| 99.528.750-1 | Sociedad Generadora Austral S.A.              | SGA              | Chile   | Us Dollar           | 100.0000%            | 0.0000%    | 100.0000% | 100.0000%  |  |  |
|              | Sistema de Transmisión del Sur S.A. (ex Saesa |                  |         |                     |                      |            |           |            |  |  |
| 77.312.201-6 | Transmisión S.A.)                             | Nueva STS        | Chile   | Chilean peso        | 99.9996%             | 0.0004%    | 100.0000% | 100.0000%  |  |  |
| 76.186.388-6 | Sagesa S.A.                                   | SAGESA           | Chile   | Us Dollar           | 99.8987%             | 0.1000%    | 99.9987%  | 99.9987%   |  |  |
| 76.410.374-2 | Sistema de Transmisión del Norte S.A.         | STN              | Chile   | Us Dollar           | 100.0000%            | 0.0000%    | 100.0000% | 100.0000%  |  |  |
| 76.440.111-5 | Sistema de Transmisión del Centro S.A.        | STC              | Chile   | Us Dollar           | 100.0000%            | 0.0000%    | 100.0000% | 100.0000%  |  |  |
| 76.519.747-3 | Sociedad Austral de Transmisión Troncal S.A.  | SATT             | Chile   | Us Dollar           | 100.0000%            | 0.0000%    | 100.0000% | 100.0000%  |  |  |
| 76.429.813-6 | Línea de Transmisión Cabo Leones S.A.         | CABO LEONES      | Chile   | Us Dollar           | 99.9900%             | 0.0100%    | 100.0000% | 100.0000%  |  |  |
| 76.389.448-7 | Tolchén Transmisión SpA                       | TOLCHÉN          | Chile   | Us Dollar           | 100.0000%            | 0.0000%    | 100.0000% | 0.0000%    |  |  |

**Non-controlling interest** – A parent company will present the non-controlling interests in the Consolidated Statement of Financial Position, within equity, separately from the equity of the owners of the parent company.

Changes in the Company's ownership interest in a subsidiary that do not result in a loss of control over subsidiaries are accounted for as equity transactions. The carrying amounts of the participation of the Company and the controlling interests are adjusted to reflect the change in their relative interests in the subsidiaries. Any difference between the amount for which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

**Associates and joint ventures** – An associate is an entity over which the Company exercises significant influence. Significant influence is the power to participate in the financial and operating policy decisions of an investee, but it is not control or joint control over those policies.

A joint venture is a joint agreement whereby the parties having joint control of the agreement are entitled to the net assets of the joint agreement. Joint control is the contractual agreement to share control of an agreement, which only exists when decisions on relevant activities require the unanimous consent of the parties sharing control.

The results, assets, and liabilities of the associated and/or joint ventures are incorporated in these Consolidated Financial Statements using the equity method, except when the investment is classified as held for sale, in which case it is accounted for in accordance with IFRS 5 in the item Non-current Assets held for sale and discontinued operations in the Consolidated Financial Statements.

Under the equity method, investments in associates and/or joint ventures are initially recorded at cost and are adjusted subsequently in function of the changes that it experiences, after the acquisition, the portion of the net assets of the associate that corresponds to the Company, less any impairment in the value of individual investments.

If part of a Company in the losses of the associate or joint venture equals or exceeds its interest in these, the Company discontinues recognizing its share of further losses, unless there is a commitment by the Company to replenish the equity situation of the associate or joint venture, in which case, the corresponding liability is recorded.

The dividends received from these companies are recorded by reducing the book value of the shareholding and the results obtained by them, which correspond to the Company according to their participation, are recorded under "Profit sharing (loss) of associates accounted for using the equity method ".

#### 2.6 Business combination

Business combinations are accounted for using the purchase method. This involves the recognition of identifiable assets (including previously unrecognized intangible assets) and liabilities (including contingent liabilities and excluding future restructuring processes) of the acquired business at fair value. If these business combinations involve acquiring control of an investment in which the Company had significant influence or joint control, such prior interest is accounted for at fair value and recognizing the effect on profit and loss.

#### 2.7 Functional and reporting currency

#### a) Functional currency

The functional currency of each entity in the Group has been determined as the currency of the main economic environment in which it operates. Transactions in currency other than those made in the functional currency of the entity are translated at the exchange rate prevailing at the date of the transaction. Assets and liabilities denominated in currencies other than the functional currency will be retranslated at the year-end exchange rates. Gains or losses from re-measurement will be included in net gains or losses in other financial items.

The Company's functional currency of the subsidiaries are distributed as follows:

| Company name                                 | Abbreviated<br>name | Functional currency |
|--|---------------------|---------------------|
| Sistema de Transmisión del Sur S.A.          | STS                 | Chilean peso        |
| Sociedad Generadora Austral S.A.             | SGA                 | US Dollar           |
| Sagesa S.A.                                  | SAGESA              | US Dollar           |
| Sistema de Transmisión del Norte S.A.        | STN                 | US Dollar           |
| Sistema de Transmisión del Centro S.A.       | STC                 | US Dollar           |
| Sociedad Austral de Transmisión Troncal S.A. | SATT                | US Dollar           |
| Línea de Transmisión Cabo Leones S.A.        | CABO LEONES         | US Dollar           |
| Tolchén Transmisión SpA                      | TOLCHÉN             | US Dollar           |

#### b) Entity's reporting currency

The entity's reporting currency is the Chilean peso, as it corresponds to the currency of the Group's parent company, Inversiones Eléctricas del Sur S.A. and that it is the currency that best represents the economic environment in which the aforementioned Parent Company operates.

The conversion procedure used when the reporting currency is different from the functional currency is as follows:

- The assets and liabilities of each of the statements of financial position, using the exchange rate in force on the closing date of the corresponding statements of financial position.
- Income and expenses for each of the statements of comprehensive income will be translated at the
  exchange rates of the date of each transaction or at the average exchange rate, unless this average
  is not a reasonable approximation of the cumulative effect of the rates existing on the dates of the
  transaction; and
- The exchange differences produced in the translation of the Financial Statements will be recognized in the statement of other comprehensive income.

#### 2.8 Basis of translation

Transactions in a currency other than the functional currency are considered transactions in a foreign currency. Transactions in currencies other than the functional currency of each company are recorded at the exchange rates in force at the date of the transaction. During the period, any differences that arise between the balances translated at the exchange rate prevailing at the date of collection or payment are recorded as exchange differences in the Interim Consolidated Statement of Comprehensive Income.

Also, balances receivable or payable at each period-end denominated in currencies other than the functional currency of each company are translated at the year-end exchange rate. The resulting translation differences are recorded as exchange differences in the Interim Consolidated Statement of Comprehensive Income.

The assets and liabilities in foreign currency and in the adjustable currency (UF) are translated at the exchange rates at current values at the closing date of the Consolidated Interim Financial Statements, according to the following details:

| Foreign company                     | Abbreviated | 06-30-2022 | 12-31-2021 | 06-30-2021 |
|-------------------------------------|-------------|------------|------------|------------|
| Foreign currency                    | name        | \$         | \$         | \$         |
| US Dollar (US\$)                    | USD         | 932.08     | 844.69     | 727.76     |
| Unidad de Fomento (Inflation index- |             |            |            |            |
| linked unit of account)             | UF          | 33,086.83  | 30,991.74  | 29,709.83  |

#### 2.9 Offsetting of balances and transactions

As a general rule, assets and liabilities, income, and expenses, are not offset in the consolidated interim financial statements, unless offsetting is required or is permitted by some standard and the presentation reflects the substance of the transaction.

#### 2.10 Property, plant, and equipment

Property, plant, and equipment are stated at acquisition cost less accumulated depreciation and accumulated impairment.

In addition to the amount paid for the acquisition or construction of each item, cost also includes, where appropriate, the following items:

- Borrowing costs incurred during the construction period that are directly attributable to the acquisition, construction, or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, such as, for example, transmission or generation facilities. The interest rate used is that of specific-purpose financing or, failing that, the weighted average financing rate of the Company and its subsidiaries.
- The capitalized amount and the capitalization rate are as follows:

| Control of the district of the control of the contr | 06-30-2022 | 06-30-2021 |
|--|------------|------------|
| Costs for capitalized loans  | ThCLP\$    | ThCLP\$    |
| Costs for capitalized loans (see note 24)  | 1,855,585  | 1,643,867  |
| Costs capitalization rate functional currency CLP  | 3.19%      | 3.74%      |
| Costs capitalization rate functional currency USD  | 3.00%      | 3.00%      |

- Personnel costs directly related to work in progress as of June 30, 2022, and 2021 amounted to ThCLP\$
  1,034,851 and ThCLP\$ 1,387,214, respectively (see note 21).
- The future costs that the Company and its subsidiaries will have to incur in respect of the closure of their facilities are capitalized as part of the cost of the asset, at present value, and a related provision is recognized. Each year, the Company and its subsidiaries review their estimate of these future costs, by increasing or decreasing the value of the asset based on the results of this estimate.

The works in progress are transferred to working assets once the test period when they become available for use has been completed, which is the starting point for their depreciation.

The existing costs of substantial expansion or improvement of structures, facilities or equipment correspond to the replacement or improvement of parts, but without replacing the entire asset, and which lead to extension of the useful life, increase in capacity, decrease in operating costs, or increase in value through the benefits associated with the asset, are incorporated as an increase in the cost of the asset. These costs also include requirements by the authorities or commitments made by the Company and its subsidiaries, and in case these are not complied with, will not allow the use of the asset.

Subsequent costs (replacement of components, improvements, extensions, or expansions) are included in the value of the initial asset or are recognized as a separate asset. The value of the replaced component is derecognized.

The other maintenance and repair expenses that do not comply with the above are recognized in profit and loss for the period in which they are incurred.

Depreciation is calculated using the straight-line method over the cost of the assets less their residual value. The land on which buildings and other constructions have been built has an indefinite useful life and, therefore, is not depreciated.

The Company and its subsidiaries depreciate their fixed assets from the moment in which the assets are in conditions of use.

The residual value and the useful life of the assets are reviewed regularly, and they are adjusted prospectively, if required and if applicable.

Based on the results of impairment tests, the Company and its subsidiaries consider that the assets' carrying value does not exceed their recoverable value as of Thursday, June 30, 2022, and December 31, 2021.

The main periods of useful life used for depreciation of assets are as follows:

| Fixed Asset                      | Estimated useful life range |
|----------------------------------|-----------------------------|
| Property                         | 40 - 80                     |
| Plant and equipment              |                             |
| Lines and networks               | 30 - 44                     |
| Transformers                     | 44                          |
| Meters                           | 20 - 40                     |
| Substations                      | 20 - 60                     |
| Generation system                | 25 - 50                     |
| Information technology equipment |                             |
| Hardware                         | 5                           |
| Fixtures and fittings            |                             |
| Office furniture and equipment   | 10                          |
| Vehicles                         | 7                           |
| Other equipent and tools         | 10                          |

To operate the distribution electrical system, the companies have concessions for distribution of electricity which are granted by the Chilean Regulatory Authority and do not have an expiration date, and, therefore, they are considered indefinite.

#### 2.11 Research and development costs

During the periods presented, the Company and its subsidiaries have not recorded research costs, if any, they are accounted for with a charge to results in the year in which they occur. Nor have development costs been presented, which, if any, are accounted for as an asset to the extent that they meet the recognition criteria, otherwise they are expenses in the year in which they occur or cease to meet the criteria due to change in circumstances.

#### 2.12 Impairment of non-financial assets

Intangible assets with an indefinite useful life are tested for impairment at least annually and whenever there is an indication at the end of a reporting period that the asset may be impaired.

These assets subject to amortization are submitted to impairment testing if there is objective evidence that, as a result of one of more events that have occurred after initial recognition, the carrying value can no longer be recovered If this evidence exists, the asset's recoverable value is estimated to determine the extent of the impairment.

In the impairment assessment, assets that do not generate independent cash flow are grouped into a cash-generating unit (CGU) to which the asset belongs.

Management necessarily applies its judgment in the grouping of assets that do not generate independent cash flows and also in the estimation, periodicity, and values of the underlying cash flow in the calculation values.

Subsequent changes in the grouping of the CGU or the periodicity of the cash flows could impact the book value of the respective assets.

The recoverable value is the higher of fair value less costs to sell, and value in use. The last corresponds to the discounted estimated future flows.

If the recoverable value of an asset or CGU is estimated to be less than its book value, the latter is reduced to the recoverable value. Impairment is recognized as other depreciation. In the event that an impairment is subsequently reversed, the book value increases to the revised estimate of the recoverable value, but to the extent that it does not exceed the book value that would have been determined, if no impairment had been previously recognized. A reversal is recognized as a decrease in depreciation charge immediately in the result of the period.

As indicated, purchased goodwill is reviewed annually, or when there are indications of impairment or events or changes in circumstances that indicate that the book value has been impaired. Impairment is determined, for purchased goodwill, by evaluating the recoverable amount of the cash-generating unit to which that goodwill is related.

When the recoverable amount of the CGU is lower than the carrying value of the cash-generating units to which goodwill has been assigned, an impairment loss is recognized. Impairment losses related to purchased goodwill cannot be reversed in future periods.

To calculate the recovery value of property, plant and equipment, goodwill and intangible assets, the value in use is the criteria used by the Company and its subsidiaries in most cases.

To estimate the value in use, the Company and its subsidiaries prepare future cash flow projections based on the most recent budgets available and approved by Management. These budgets incorporate the best estimates of the Administration on the income and costs of the Cash Generating Units using sectoral projections, past experience and future expectations.

The Company and its subsidiaries have defined their operating segment as distribution and for each of their subsidiaries the relevant business segment (mainly transmission or distribution) as the Cash Generating Unit (CGU) for purposes of performing impairment tests, the Intangible assets with an indefinite useful life existing at the date of the impairment test are fully assigned to these CGUs.

The flows are discounted to calculate their present value at a rate that includes the cost of capital of the business. For its calculation, the current cost of money and the risk premiums that reflect the current market appraisals of the time value of money and the specific risks of the asset are taken into account.

#### 2.13 Leases

#### 2.13.1 The Company acts as lessee:

To determine whether a contract is, or contains, a lease, the Company and its subsidiaries analyze the economic background of the agreement, assessing whether if the agreement transfers the right to control the use of an identified asset for a period in exchange for a consideration. It's considered that control exists if the client has i) the right to obtain substantially all the economic benefits from the use of an identified asset; and ii) right to direct the use of the asset.

At the beginning of the lease, right of use asset and a lease liability is recorded in the Consolidated Statement of Financial Position.

The Company and its subsidiaries initially recognize the right-of-use assets at cost. The cost of the right-of-use assets includes: i) amount of the initial measurement of the lease liability; ii) lease payments made; iii) the initial direct costs incurred; and iv) the estimate of costs for decommissioning or restoration.

Subsequently, the right-of-use asset is measured at cost, adjusted by any new measurement of the lease liability, less accumulated depreciation, and accumulated losses due to impairment of value.

The right-of-use asset is depreciated in the same terms as the rest of similar depreciable assets, if there is reasonable certainty that the lessee will acquire ownership of the asset at the end of the lease. If such certainty does not exist, the asset depreciates in the shortest period between the useful life of the asset or the lease term.

The lease liability is initially measured at the present value of the lease payments, discounted at the incremental loan rate of the Company and its subsidiaries, if the interest rate implicit in the lease could not be easily determined. Lease payments included in the measurement of the liability include: i) fixed payments, less any lease incentive receivable; ii) variable lease payments that depend on an index or rate; iii) residual value guarantees; iv) exercise price of a purchase option; and v) penalties for lease term.

After the beginning date, the lease liability is increased to reflect the accrual of interest and is decreased by the lease payments made. In addition, the carrying amount of the liability is measured again if there is a modification in the terms of the lease (changes in the term, in the amount of payments or in the evaluation of an option to buy or change in the amounts to be paid). Interest expense is recognized as an expense and is distributed among the periods that constitute the lease period, so that a constant interest rate is obtained in each year on the outstanding balance of the lease liability.

Short-term leases, equal to or less than one year, or low-value assets leases are excepted from the application of the recognition criteria described above, recording the payments associated with the lease as an expense in a straight-line method throughout the lease term.

#### 2.13.2 The Company acts as lessor:

When the Company and its subsidiaries act as lessor, they classify at the beginning of the agreement whether the lease is operating or financial, based on the essence of the transaction. Leases in which substantially all risks and rewards inherent in ownership of the underlying asset are transferred are classified as financial leases.

All other leases are classified as operating leases.

In the case of financial leases, on the beginning date, the Company recognizes in its Interim Consolidated Statement of Financial Position the assets held in financial lease and presents them as an account receivable, for an amount equal to that of the net investment in the lease, calculated as the sum of the current value of the lease installments and the current value of any residual value accrued, discounted at the interest rate implicit in the lease. Subsequently, financial income is recognized throughout the term of the lease, based on a model that reflects a constant rate of return on the net financial investment made in the lease.

In the case of operating leases, lease payments are recognized as income in a linear manner during the term of the lease, unless another systematic basis of distribution is more representative. The initial direct costs incurred to obtain an operating lease are added to the carrying amount of the underlying asset and are recognized as an expense over the term of the lease, on the same basis as the income from the lease.

#### 2.14 Financial instruments

Financial assets and financial liabilities are recognized in the Company's Interim Statement of financial position when the Company and its Subsidiaries become a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables that do not have a significant financing component which are measured at transaction price (see revenue footnote). Transaction costs that are directly attributable to the acquisition or issuance of financial assets and liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added or deducted from the fair value of financial assets and liabilities, as appropriate, at initial recognition.

Transaction costs directly attributable to the acquisition of financial assets or liabilities at fair value through profit or loss are immediately recognized in the Statement of Comprehensive Income.

#### 2.14.1 Financial Assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are measured subsequently in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

a) Classification and initial measurement of financial assets

The classification and measurement criteria correspond to the following:

- Debt instrument at amortized cost:
  - The asset is held within a business model the objective of which is to hold the assets to obtain the
    contractual cash flows.
  - The contractual conditions of the financial asset give rise, on specified dates, to cash flows that are only payments of the principal and interest on the outstanding principal amount.
- ii. Debt instrument at fair value through other comprehensive income (FVTOCI):
  - The financial asset is maintained within a business model, whose objective is achieved by obtaining contractual cash flows as selling financial assets; and
  - The contractual conditions of the financial asset give rise, on specified dates, to cash flows that are only payments of capital and interest on the outstanding principal amount.
- iii. Fair value through profit and loss (FVTPL):

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

 The Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met; and

 The Group may irrevocably designate a debt investment that meets the amortized cost or FVTPL criteria measured at FVTPL if doing so would eliminate or significantly reduce an accounting adjustment.

#### b) Subsequent measurement of financial assets

Financial assets are measured subsequent to their acquisition based on their classification as follows:

- In the case of financial assets initially recognized at amortized cost, they are measured using the
  effective interest rate method, which links estimated future cash receipts over the expected life of
  the financial asset.
- ii. Financial assets recognized at fair value with changes in other comprehensive income are subsequently measured at fair value. Interest income is calculated using the effective interest rate method, exchange gains and losses and impairment are recognized in results. Other net gains and losses are recognized in the statement of comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to profit or loss for the period.
- iii. In relation to financial assets initially recognized at fair value through profit or loss, these are subsequently measured at fair value. Net gains or losses, including any interest or dividend income, are recognized in profit or loss for the period. These financial assets are held for trading and are acquired for the purpose of selling them in the short term. Financial assets in this category are classified as other current financial assets.

#### c) Impairment of non-derivative financial assets

For trade receivables, finance lease receivables and contract assets, the Company has applied the simplified approach in IFRS 9 to measure the expected credit loss (ECL).

Under this simplified approach, the Company has determined a provision matrix based on the historical default rates of its customers, as adjusted by prospective estimates considering the most relevant macroeconomic factors that affect collections and that have shown correlation with collections in the past. Macroeconomic variables are reviewed periodically. The Company identifies as the main macroeconomic variables that affect collections; the gross domestic product of the country and the regions where it is present, national, and regional unemployment rates, and variations in the purchasing power of customers.

When there is reliable information that indicates that the counterpart is in severe financial difficulties and there is no realistic prospect of recovery, for example when the counterpart has been put into liquidation or has entered bankruptcy proceedings, or in the case of trade receivables, when the amounts have been deemed uncollectable, a write-off will be recorded. Previous to the write-off, all prudential means of collection have been executed.

The trade debtors are users of the transmission systems.

In relation to loans to related parties, Management has not recognized a loss allowance as the loans to related parties are considered to be of low credit risk.

#### 2.14.2 Financial liabilities

a) Classification, initial and subsequent measurement of financial liabilities

Financial liabilities are classified as (i) at amortized cost or (ii) at fair value through profit or loss.

The Group maintains the following financial liabilities in their unaudited interim combined carve-out statement of financial position classified as described below:

#### i. Commercial accounts payable:

Obligations with suppliers are initially recognized at their fair value, this being the value to be paid, and subsequently they are valued at their amortized cost using the effective interest rate method.

ii. Obligations with banks and financial institutions.

Obligations with banks and financial institutions are initially recognized at their fair value, net of the costs incurred in the transaction.

Subsequently, they are valued at amortized cost. Any difference between the funds obtained (net of the costs necessary to obtain them) and the reimbursement value is recognized in the income statement over the life of the debt in accordance with the effective interest rate method.

#### 2.14.3 Derivatives and hedge accounting

Derivatives are contracted to manage exchange rate, interest rate, inflation, etc. risks to which the Company may be exposed.

Derivative transactions are monitored regularly and consistently over the life of the contracts to ensure that no significant departures occur from the objectives defined, so as to satisfactorily follow the strategy adopted by Management. The Company has met the requirements for cash flow hedging for the derivative instruments entered into. Also, to meet the requirements set forth in the standard, the effectiveness during the hedging period is regularly monitored. The effectiveness of derivative transactions is monitored on a retrospective and prospective basis. Such effectiveness must be within the limits defined in IAS 39 (80% - 125%). The portion of the fair value of hedging derivatives that, under the respective methodology, turns out to be ineffective is recorded through profit & loss in financial income or financial expense.

#### a) Classification of Hedge Instruments – cash flow hedges

This classification consists of designating hedge instruments to hedge the exposure to changes in the cash flows of an asset, liability (such as a swap to fix interest payments on a debt with a floating rate), a highly probable forecast transaction or a proportion thereof, provided that such changes: i) are attributable to a particular risk; and ii) could affect future profit or loss.

The effective portion of the changes in the fair value of the derivative instruments that are designated and qualified as cash flow hedging instruments is deferred in equity in a net equity reserve called "cash flow hedge." Deferred amounts in equity are recognized in profit or loss in the same periods in which the hedged item affects results.

However, when the expected hedged transaction results in the recognition of a non-financial asset or a non-financial liability, gains and losses previously deferred in equity are transferred from equity and included in the initial valuation of the cost of that asset or liability.

Hedge accounting is discontinued when the hedge relationship is canceled, when the hedge instrument expires or is sold, is terminated, or exercises, or no longer qualifies for hedge accounting.

Any deferred gain or loss on equity at that time is held in equity and recognized when the expected transaction is finally recognized in profit or loss. When an expected transaction is no longer expected to occur, the cumulative gain or loss that was deferred is recognized immediately in income.

#### 2.15 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is calculated using the weighted average cost method.

#### 2.16 Other non-financial liabilities

This item includes the following:

#### 2.16.1 Deferred income

These amounts are recorded as deferred income in the liabilities of the Interim Consolidated Statement of Financial Position and are charged to income under "Revenue from ordinary activities" in the Consolidated Statement of Comprehensive Income to the extent that the service accrues.

In "Other Non-Current Non-Financial Liabilities" the advance payment on long-term toll contracts with third parties for the use of zonal transmission assets that the Company and its subsidiaries must construct has been included. Once the construction of the asset has been completed and the toll service for the use of the asset has commenced, the recognition of the respective income in the Company's results in the corresponding proportion and over the duration of the contract will be recorded.

#### 2.16.2 Government Grants

Governmental grants are recognized at fair value, when there is a reasonable certainty that the grant will be collected and that the Company and subsidiaries will meet all statutory requirements.

Governmental grants related to assets are deducted from the carrying amount at which the corresponding asset has been recorded, and they are recognized in the statement of comprehensive income over the useful life of the depreciable asset with a reduced depreciation charge.

#### 2.16.3 Construction in Progress for Third Parties

The other works to third parties corresponds to electrical works that the entity constructs and are invoiced and/or charged in advance to third parties, other than government grants. These initially generate a liability and an equivalent account receivable. As the construction of the work progresses, the corresponding liability is reduced until the end of the construction. The utility is recognized in proportion to the degree of progress.

The Company and its subsidiaries measure the degree of progress by differentiating according to the total budget of the work (between greater or less than ThCLP\$50.000). Under this amount the degree of progress is determined in relation to the cost incurred in the project, over this amount, the progress will be measured according to technical progress reports.

Similar transactions are considered works on ThCLP\$50.000 for having the following characteristics:

- Projects for the mass replacement of luminaires in the public lighting system, tendered through the
  public market, whose financing may come from the Ministry of Energy, the Regional Government,
  or the Chilean Energy Efficiency Agency (ACHEE).
- Projects related to energy efficiency, mainly photovoltaic systems, tendered through the Public Market also with financing from the Ministry of Energy or Regional Government.
- Projects to clients (preferably construction companies) related to electrification of both aerial and underground subdivisions.

#### 2.17 Provisions

The obligations existing at the date of the Interim Consolidated Financial Statements, arising as a result of past events, in the liquidation of which the Company and its subsidiaries expects to dispose of resources that imply economic benefits and in which there is uncertainty of the amount and moment of cancellation, are recorded in the Consolidated Statement of Financial Position as provisions for the current value of the most probable estimated amount that the Company and its subsidiaries will have to pay to settle the obligation.

The estimates of provisions are quantified considering the best information available at the date of issuance of the Interim Consolidated Financial Statements, which surrounds most of the events and the circumstances that coincide with the valuation thereof.

#### 2.18 Employee Benefits

#### - Short-term, long-term employee benefits and severance indemnities.

The Company and its subsidiaries recognize the amount of the benefits payables for services rendered as a liability, which is recorded at its nominal value using the accrual method and presented under trade and other payables and current provisions for employee benefits.

The costs associated with the employee benefits involving services rendered by the employees during the period are charged to profit and loss in the respective year.

#### Post-employment benefits - Severance indemnities

The employment terms and conditions stipulate the payment of severance indemnities when an employment contract terminates. Usually this corresponds to a proportion of the base wage (0.9) multiplied by each year of service, always provided the employee has served for more than 10 years.

The severance indemnity is calculated according to appraisals made by an independent actuary, using the projected credit unit method, which is updated periodically. The obligation recognized in the Interim Consolidated Statement of Financial Position represents the present value of the compensation obligation for years of service. Losses and gains produced by changes in actuarial assumptions are recorded in other comprehensive income for the period.

The Company and its subsidiaries use assumptions to determine the best estimate of these benefits. Such estimates, just like the assumptions, are established with the assistance of an external actuary. Such assumptions include a nominal discount rate of 5.16% per annum, expected increases in the remunerations and future permanence, among other things.

The total amount of actuarial liabilities accrued at year-end is presented in the item non-current provisions for employee benefits.

#### 2.19 Classification of current and non-current balances

In the accompanying interim consolidated statement of financial position, the balances are classified according to their maturities, that is, those with maturities equal to or less than twelve months, and as non-current those with maturities greater than that period.

In the event that there are obligations whose maturity is less than twelve months, but whose long-term refinancing is assured and represents the intent of the Group and its subsidiaries through unconditionally available credit agreements with a long-term maturity, to refinance, they are classified as non-current liabilities.

#### 2.20 Income Taxes

Income tax expense for the period, is defined as the sum of current tax of the Company and its subsidiaries and results from the application of the tax rate on the tax base of the period, plus the change in assets and liabilities for deferred taxes and tax credits, both for tax loss carryforwards (to the extent realizable) as for deductible and taxable temporary differences.

Differences between the carrying amount of the assets and liabilities and their tax bases give rise to deferred tax assets and liabilities, which are measured at the tax rates that are expected to apply in the period when the asset is realized, or the liability is settled.

Income tax and changes in deferred tax assets and liabilities not arising from business combinations are recognized in profit and loss or net equity, depending on the origin of the underlying recorded item which generated the tax effect.

Deferred tax assets and tax credits are only recognized when it is considered probable that there will be sufficient future tax profits to recover the deductible temporary differences and make the tax credits realizable

Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, a deferred tax liability is not recognized if the temporary difference arises from the initial recognition of goodwill.

The Company is taxed under the "Partially Integrated Regime", first category income tax rate of 27%.

#### 2.21 Recognition of income and expenses

The Company and its subsidiaries consider as operational revenue, in addition to the services invoiced in the period, an estimate for the services provided pending of billing at the end of the year. In addition, the costs associated with such revenues have been duly included as operating costs.

The company and its subsidiaries recognize revenue from the following main sources:

- Transmission
- Revenue from retail sale of products and services
- Interest income
- · Revenue from the maintenance of third parties' facilities

The Company and its subsidiaries recognize revenue when (or as) control over a good or service is transferred to the customer. Revenue is measured based on the consideration to which it is expected to be entitled for said transfer of control, excluding amounts collected on behalf of third parties.

#### (i) Transmission:

Revenues from power transmission services are recorded based on the effective billing of the year of consumption, plus an estimate of the services provided and not billed at the closing date of the period, in these contracts there is a performance obligation. Revenues for Transmission services are recognized over time.

#### (ii) Revenue from retail sale of products and services:

Revenue from the sale of household products, materials and equipment is recognized when the significant risks and benefits of the goods have been transferred to the buyer, the performance obligation is satisfied when the control of the good has been transferred to the customer. The transfer of goods for the sale of products occurs at the point of sale, where the customer physically obtains the good and moment where billing also occurs. Revenues from the retail sale of products and services are recognized at a point in time.

Revenue is measured at the fair value of the payment received, excluding discounts, rebates, and sales taxes.

#### (iii) Interest revenue:

Interest revenue is accounted for considering the effective interest rate applicable to the principal pending amortization during the corresponding accrual period. Interest revenue is recognized over time.

#### (iv) Revenue from the maintenance of third parties' facilities:

Revenues from maintenance of third-party facilities are recorded based on actual billings for the period of consumption, plus an estimate of services provided and not billed at the end of the period. Third-party facility maintenance revenue is recognized at a point in time.

The Company and its subsidiaries determine the existence of significant financing components in its contracts, adjusting the value of the consideration, if applicable, to reflect the effects of the time value of money. However, the Company applies the practical solution provided by IFRS 15 and will not adjust the value of the promised consideration for the effects of a significant financing component if the Company expects, at the beginning of the contract, that the period elapsed between the payment and the transfer of goods or services to the customer is one year or less.

Given that the Company mainly recognizes revenue for the amount to which it is entitled to invoice, it has decided to apply the practical disclosure solution provided for in IFRS 15, by which it is not required to disclose the aggregate amount of the transaction price assigned to the obligations of unsatisfied (or partially unsatisfied) performance at the end of the reporting year.

#### 2.22 Dividends

Dividends distributed to shareholders are recognized as a liability on an accrual basis at the end of the reporting period in the Interim Consolidated Financial Statements of the Company, based on the dividend policy agreed upon by the shareholders or as set forth in the by-laws, which to date corresponds to the statutory minimum dividend payments set forth in Article Nº79 of Corporations Law No. 18.046. The Shareholders' Meeting has the sovereign right to change the indicated value, which does not necessarily apply for the following years.

For the calculation of the distributable net earnings, the Company will not adjust "Profit (Loss) attributable to the Controlling Interests" in the Interim Consolidated Statement of Comprehensive Income. Given the above, the values of such item less accumulated losses, if any, will be used as a basis. The distributed dividends will be deducted from that result. The dividends will be charged to the income for the period. The IFRS first-time adoption adjustments will not be part of this calculation as long as they are not made.

#### 2.23 Statement of cash flows

The cash flow statement reflects the changes in cash and cash equivalents during the period, calculated using the direct method. The following terms are used in the statements of cash flow:

- **Cash Flows:** Inflows and outflows of cash and cash equivalents, which are investments with a term of less than three months, and which are highly liquid and subject to an insignificant risk of change in value.
- **Operating Activities:** Are the activities related to the principal revenue-producing activities of the Company and its subsidiaries and other activities that are not investing or financing activities.
- Investing Activities: Are the activities related to the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.
- Financing Activities: Are the activities that result in changes in the size and composition of equity and liabilities of a financial nature.

#### 2.24 Reclassification

For comparative purposes, certain reclassifications have been made to the Interim Consolidated Financial Statements as of June 30, 2022.

#### 2.25 New accounting pronouncements

a) The following Amendments to IFRS has been applied to these consolidated interim financial statements:

| Amendments to IFRS  | Mandatory Application Date                           |
|---|--|
| Reference to the Conceptual Framework (Amendments to IFRS 3)  | Annual periods beginning on or after January 1, 2022 |
| Property, Plant and Equipment - Revenue before Intended Use (amendments to IAS 16)                        | Annual periods beginning on or after January 1, 2022 |
| Onerous Contracts — Cost of Fulfilling a Contract (Amendments to IAS 37                                   | Annual periods beginning on or after January 1, 2022 |
| Annual Improvements to IFRS Standards, 2018-2020 cycle (amendments to IFRS 1, IFRS 9, IFRS 16 and IAS 41) | Annual periods beginning on or after January 1, 2022 |

The application of the amendments has not had a significant effect on the results reported in these Consolidated Financial Statements, however, they could affect the accounting of future transactions or agreements.

b) Accounting standards with effective application not yet in force: Accounting pronouncements not yet effective:

As of the date of issuance of these Consolidated Interim Financial Statements, the following standards and amendments had been issued by the IASB but were not mandatory.

| New IFRS  | Mandatory Application Date                           |
|---|--|
| IFRS 17, Insurance Contracts  | Annual periods beginning on or after January 1, 2023 |

| Deferred Tax related to Assets and Liabilities arising from a Single Transaction (amendments to IAS 12) | Annual periods beginning on or after January 1, 2023 |

The Company and its subsidiaries are evaluating the impact of the application of the standards and amendments.

#### 3 Industry Regulation and Operation of the Electrical System

The Chilean electrical sector participates in the activities of generation, transportation, and distribution of electrical energy, which are performed by private companies, with the government performing a regulatory, supervisory, and complementary function. The above means that the companies make decisions about their investments, marketing of their services and the operation of their facilities; consequently, they are responsible for the quality of the service provided in each segment, as stipulated in the electrical sector's regulatory framework.

In systems with an installed capacity equal to or greater than 200 MW, the actors of the electricity sector operate in coordination, and this coordination is in charge of the National Electrical Coordinator ("CEN").

Chile, as of November 2017, is the National Electric System (SEN) covering the area between Arica to Chiloé as a result of the interconnection of the Norte Grande Interconnected System and the Central Interconnected System. On the other hand, there are several medium-sized systems (SSMM) operated by vertically integrated companies, (including the subsidiaries' Saesa and Edelaysen), whose installed generation capacity is less than 200 MW, but greater than 1,500 KW, and which mainly serve the consumption of the regions of Los Lagos, Aysén and Magallanes.

#### 3.1 Generation of electricity

Generation of electricity is an activity characterized by free participation and no obligation to obtain concessions, except for the construction and operation of the hydroelectric power plants.

In Interconnected Systems such as the SEN there are three main markets that differ, both in the type of customers and in the type of rate applicable to each one.

a) Free customers market: Corresponds to those customers with installed capacity greater than 5 MW, who freely agree their tariff with the generator. Customers between 500 kW and 5 MW may choose to belong to the free or regulated customer market and may not change their tariff regime for four years.

- b) Spot Market: Segment in which generating companies participate when making transactions among themselves, either by means of energy contracts or through sales at marginal cost.
- c) Regulated customers market: Segment consisting of all the transfers of energy between generation and distribution companies to supply customers subject to price regulation (hereinafter, "regulated customers"). In this way, the distribution companies become customers of the generating companies.

The price at which these latter transactions are performed is obtained from open, transparent, and nondiscriminatory tendering, which currently is established for a minimum contract period of 20 years. It should be noted that the power purchase price of tenders is set at the level of core bars.

Regardless of the final market supplied by a generator, transfers between generating companies (surplus to deficit) participating in the system are performed at the hourly incremental cost. The agency in charge of performing these calculations is the Direction of Tolls of the National Electrical Coordinator.

#### 3.2 Transmission

Transmission systems are classified into three groups: National Transmission, Zonal Transmission and Dedicated Transmission, with the first two having open access and regulated tariffs.

In the case of dedicated transmission, access may be denied in the case of available technical capacity, and transportation charges are governed by private contracts between the parties, except for those destined to the supply of users subject to price regulation, in which case the charges are defined by the National Energy Commission.

The information to define the tolls is public in all cases. The collection system of the transmission companies constitutes a toll charged to the generation companies and to the final users. This toll allows the companies that own the transmission facilities to recover and remunerate their investments in transmission assets and collect the costs associated with the operation of said assets. The toll may be regulated by the Regulatory Authority, determined in Public Tenders, or by private contracts between the parties.

#### 3.3 Regulatory Framework

#### 3.3.1 Background

The Chilean electrical industry has been regulated since 1982, mainly by Decree with Force of Law No.1/82, which contains the General Law on Electrical Services (LGSE in Spanish), and the organic regulation of said Law, contained in Supreme Decree No. 327/97.

To the amendments to the Law, that is, Short Law I and Short Law II, and which had a positive impact on the sector by encouraging the level of investment and regulating the process of obtaining power purchase contracts by distributors to satisfy consumption, other modifications have been added in various matters.

#### 3.3.2 Transmission Law

On July 20, 2016, the new Transmission Law was published in the Official Gazette (Law No. 20.936) that establishes a New Electric Transmission System and creates an Independent Coordinating Agency of the National Electric System.

The main changes proposed by this Law are:

- a) Functional definition of the transmission: The "electricity transmission or transport system" is the set of electrical lines and substations that are part of an electrical system, and that are not intended to provide the public distribution service.
- b) Remuneration: It will be through unique charges that will ensure the recovery of the investment and the administration, operation, and maintenance costs efficient and recognized in the tariff decrees. The current volatility is eliminated due to variations in electricity consumption. The recognized value for the 2018–2019 biennium of the existing transmission facilities was set through DS 6T/2018. As of January 2018, it ensures the income of the decree and eliminates the dependence on demand.

- c) Total open access to installations of transmission systems of the electrical system and may be used by third parties under non-discriminatory technical and economic conditions among all users, through payment of the corresponding transmission system remuneration.
- d) Change in discount rates used to remunerate facility costs from a real annual fixed rate of 10% before taxes at a rate that considers the systematic risk of the companies' own activities in relation to the market, the rate risk free and the prize for market risk, with a floor of 7% real after tax.
- e) Strip Studies: The State may establish that certain new works projects may use this mechanism, which consists of delivering to the adjudicated a preliminary strip with the approval of the Council of Ministers for Sustainability, and the adjudicated must develop the specific layout within the preliminary strip and obtain the Environmental Qualification Resolution corresponding to the project. Subsequently, easements are imposed by decree, for reasons of public utility. With respect to the negotiation and payment of easements, the same current mechanisms are maintained.
- f) Law No. 20.936 established a new regulatory framework for the transmission service. The first valuation process under this new framework corresponds to the period 2020-2023. The studies were awarded to different consultants (Synex: National and SUGLA: Zonal and Dedicated used by regulated) which were finalized in December 2020. The National Energy Commission ("CNE") published its final technical report ("ITF"), after receiving and analyzing observations to the preliminary version of the report. During the second half of 2021 the discrepancy stages were carried out in the Expert Panel by participants, users and interested institutions. The CNE published its Definitive Technical Report ("ITD") in March 2022, which will be the basis for the valuation decree. The decree is expected to be sent to the Comptroller's Office in the first half of 2022. The resulting values will be retroactive to January 2020.

#### 3.3.3 Regulating, supervisory, and coordinating agencies

The national electrical industry is regulated essentially by government bodies, including the National Energy Commission, the Ministry of Energy, and the Superintendence of Electricity and Fuels, which perform oversight, regulatory and coordinating functions.

- a) National Energy Commission (CNE in Spanish): It is primarily responsible for the proper functioning and development of the national energy sector. Specifically, the CNE is responsible for designing industry standards and the calculation of rates. Additionally, it acts as a technical entity and informs the Panel of Experts when divergences arise among the members of the CEN or when there are differences in the processes of pricing, among other matters.
- b) Superintendence of Electricity and Fuels (SEC in Spanish): Decentralized Organization in charge of monitoring and overseeing compliance with the laws, regulations and technical standards governing the generation, production, storage, transportation, and distribution of liquid fuels, gas, and electricity. Additionally, it grants provisional concessions and verifies the quality of the services provided.
- c) Ministry of Energy: Institution created in 2010, in charge of establishing node prices, transmission and sub-transmission usage charges, and distribution tariffs. In addition, it grants definitive concessions, subject to prior report from the SEC. The overall purpose of the Ministry of Energy is to draw up and coordinate the plans, policies and standards for proper operation and development of the sector, oversee compliance thereof and advise the Government with regard to all energy-related matters.
- d) National Electrical Coordinator ("CEN" in Spanish): Institution created in the Transmission Law, which has the following functions:
  - To preserve the safety of the service.
  - To guarantee the operation at minimum cost of all the facilities that make up the system.
  - To guarantee access to the transmission facilities to supply the final customers (distributors or free customers).

#### 4 Risk management policy

The risk management strategy is aimed at protecting the Company, its subsidiaries, its employees, and their environment from situations that may adversely affect them. To achieve the objectives, financial risk management is based on covering all significant exposures, provided that adequate management techniques exist, and the cost is reasonable.

The main risks to which the Company and its subsidiaries are exposed are as follows:

#### 4.1 Financial risk

The flows of the Company, which are mainly generated by its participation in the electricity business, have a very stable and long-term profile. The transmission business has a tariff structure which contemplates costs as denominated in international and local markets and any associated exchange rate or CPI effects, where applicable.

The Administration and Finance Area of Inversiones Eléctricas de Sur S.A., the controlling party of the Entities, historically has been in charge of identifying and responding to financial risks through mitigation measures proposed to Management and/or the respective Boards of Directors

The Company's financial risks are managed in such a way as to maintain a balance between cash flows from operating activities and the needs for payment of financial liabilities. As of June 30, 2022, the Company and its subsidiaries had cash and cash equivalents in the amount of ThCLP\$40,665,294. The total debt amounted to ThCLP\$500,672,983 Of the total financial liabilities, 0.6% is repayable within one year (related to interests of the bond), and 99,4% of the financial liabilities are repayable after more than 5 years (related to bonds).

#### 4.1.1 Exchange rate

The transactions of the Company and its subsidiaries are denominated in US dollars and Chilean pesos.

The Company performs a review of its financial assets and liabilities and the potential impact of the changes in the exchange rate. If the impact could be significant, the Company may contract derivatives to reduce the effects of these impacts in line with its documented hedging strategy.

Those subsidiaries that maintain their functional currency in Chilean pesos are exposed to exchange rate variations of the U.S. dollar through their revenues, given the indexation in this currency for their monthly pricing.

Additionally, these subsidiaries are exposed to exchange rate variations in certain foreign currency expenses, mainly U.S. dollars.

As of June 30, 2022, the subsidiary STA holds a forward derivative instrument.

#### 4.1.2 UF Variance

With respect to the revenue of the Company, more than 48% is denominated in Chilean pesos that are indexed to CPI (local). Tariffs are established taking into account, where applicable, exchange rates (i.e., when supplies are acquired principally in a particular currency) and CPI in the United States or other countries. The local inflation-indexation effects are also incorporated into the associated tariff, or, in the case of unregulated customers, the contracts may be denominated in the inflation-indexed monetary unit of Chile.

#### 4.1.2.1 Sensitivity analysis

The Company and its subsidiaries performed a sensitivity analysis of the variation of the UF for Other current and non-current financial liabilities (loans and bonds in CLP and UF) assuming that all other variables remain constant. This methodology consists of measuring, for the aforementioned interest-bearing liabilities, the positive variation of half a percentage point on an annual basis of the UF for the year of closing of these Financial Statements, with respect to the actual variation of the UF.

The result of the analysis showed that, in accordance with the above condition, there is an increase in the company's liabilities of ThCLP\$619,835 as of June 30, 2022.

The impact on results for the indicated analysis is the following for the periods Thursday, June 30, 2022, and 2021:

|                    | Total readju | stable debt                  |            | Effect in profit and loss |            |  |  |
|--------------------|--------------|------------------------------|------------|---------------------------|------------|--|--|
| Debt type          | 06-30-2022   | 06-30-2022 06-30-2021 Varian |            | 06-30-2022                | 06-30-2021 |  |  |
|                    | ThCLP\$      | ThCLP\$                      | mercase or | ThCLP\$                   | ThCLP\$    |  |  |
| Debt in UF (bonds) | 133,110,964  | 119,525,023                  | 0.5%       | 330,868                   | 297,098    |  |  |

#### 4.1.3 Interest rate

As of June 30, 2022, the Company maintains 100% of the financial debt associated with a fixed interest rate.

#### 4.1.4 Liquidity risk

Financial resources are obtained from own sources, traditional debt, instruments of public and private offering and capital contributions, always maintaining stable structures and ensuring optimization of the use of the most convenient products in the market. As of June 30, 2022, 99,4% of debt of the Group is structured with long-term maturities, with annual and/or half-yearly debt service (mainly interest) that are lower than projected flows in conservative scenarios, so as not to have risks of refinancing in the short or long term.

Following is the principal and interest maturity analysis as of June 30, 2022, and December 31, 2021:

The Parent Company Inversiones Grupo Saesa Limitada carries out joint management of flows with the Company, which through its surpluses, or through different debt instruments in the financial market, finances new investments in transmission projects of the Group with intercompany loans and these are paid by the subsidiary with the flows generated by these investments or with third-party credits, to the extent that the conditions are favorable.

#### 4.1.5 Credit risk

The Company and subsidiaries are exposed to credit risk due to their operational activities and financial activities. Its policies are intended to reduce non-payment of counterparts and to improve the working capital position.

Credit risk related to financial instruments (time deposits, mutual funds or other) taken with financial institutions, is related to the contracting of instruments that maximize the returns of cash surplus. The Company analyzes the appropriate level of risk to take and maximum exposure, all under the risk margin established and in order to meet short-term obligations.

Investments of cash surpluses are carried out in national financial institutions with very high credit quality risk rating (see Note 6b, Cash and Cash Equivalents), with limits established for each entity and only in fixed income instruments. In no case is it considered or contemplated the possibility of making an investment in order to speculate in the national or foreign capital market.

#### 4.1.6 Covid Risk

In this context, the Company has implemented several action plans to face this pandemic, which include aspects of protection of the health of employees, ensuring operational continuity and compliance with the established with clients, monitoring of past due accounts by type of debtors and portfolio and analysis of future capital and liquidity requirements.

For the Company and its subsidiaries, the priority has been to maintain operational and supply continuity according to the standards required by current regulations, taking care of its workers, contractors, and customers, in view of the possible effects of the COVID-19 outbreak, in addition to considering the government measures that they are being taken to reduce their spread.

- Operational continuity plan: As of June 30, 2022, the Company is implementing a flexible and blended
  return plan for its workers, which will be subject to the evolution of the pandemic and the measures
  adopted by the relevant health authority.
- Employee's health protection: Implementation of sanitary protocols for those workers who must carry out their work in the field, both in operation and maintenance, construction, and public service activities, in addition to having safety kits based on the recommendations of the competent health authorities. This has made it possible to maintain the operating standards of the electrical system for the companies that provide the electricity supply service (as required by law, since these public service companies cannot stop providing the service), as well as to avoid greater delays in the construction of works that will attend the future growth of consumption.

#### 5 Judgments and estimates of Management in applying the entity's significant accounting policies

Company Management is responsible for the information contained in these Interim Consolidated Financial Statements.

The preparation of the accompanying Interim Consolidated Financial Statements requires the use of certain judgments, estimates and assumptions by Management that affect the reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures, and the disclosure of contingent liabilities at the date of the financial statements. Estimates and assumptions are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The following are the significant judgments, estimates and assumptions used by management in the preparation of these Interim Consolidated Financial Statements:

- a) **Economic useful life of assets:** The useful life of property, plant and equipment that are used for the purpose of calculating depreciation is determined based on technical studies prepared by external and internal specialists. In addition, these studies are used for new acquisitions of property, plant, and equipment, or when indicators exist that the useful lives of these assets should be changed.
  - These calculations require the use of estimates and assumptions such as technological change and expected term of operational availability of transmission assets. Changes in estimates are considered prospectively.
- b) Impairment of assets: The Company reviews the book value of their tangible and intangible assets to determine if there is any indication that the book value cannot be recovered. If such an indicator exists, the asset's recoverable value is estimated to determine the extent of the impairment. In the impairment assessment, assets that do not generate independent cash flow are grouped into a Cash Generating Unit ("CGU") to which the asset belongs. The recoverable amount of these assets or CGU, is measured as the greater value between its fair value (the value in use) and its book value.

These assessments require the use of estimates and assumptions such as:

- Revenues from transmission tolls: The value of transmission tolls (of the Regulated and Non-Regulated Transmission Systems) in accordance with the rate decrees (or existing contracts) and the possible impact of the regulation.
- Investments in property, plant, and equipment: The requirements of the new facilities to absorb
  the demand, as well as the regulatory requirements (example: Investment per Technical Standard)
  are considered in these projections. The Investment Plan is periodically updated to deal with the
  growth of the business.
- Fixed costs: Fixed costs are projected taking into account the current base, the growth of sales, customers, and investments. Both in relation to staffing (considering salary adjustments and the Chilean CPI), as well as other operation and maintenance costs, and the projected level of inflation.
- Macroeconomic variables: The macroeconomic variables (inflation, exchange rate, among others)
  necessary to project the flows (sales rates and costs) are obtained from third-party reports.
- c) Income and operational costs: The Group considers as revenue, in addition to services billed in the period, an estimate for the services provided pending billing at the end of the period, considering that the metering is performed during the month according to a metering program. In addition, the costs associated with such revenues have been duly included as operating costs. It is also considered as part of the revenues and costs of the operation, the estimation of certain amounts of the Electricity System (among others, purchase and sale of energy and toll collection) that allow settlements between the different companies of the System for services already provided. These values will be reversed once the final settlements are issued by the responsible regulator and recorded in the general ledger.
- d) Litigation and contingencies: The final cost for claims and lawsuits could vary due to estimates based on different interpretations of the regulations, opinions, and final evaluations of the amount of damages. Therefore, any change in the circumstances involved could have a significant effect on the amount of the provision recorded.

#### 6 Cash and cash equivalents

a) The detail of this item as of June 30, 2022, and December 31, 2021, is as follows:

| Cash and cash equivalent        | 06-30-2022 | 12-31-2021 |
|---------------------------------|------------|------------|
| Casii anu Casii equivalent      | ThCLP\$    | ThCLP\$    |
| Cash in cash                    | 100        | 100        |
| Bank Balances                   | 2,794,288  | 813,071    |
| Time deposits                   | 33,584,707 | -          |
| Other fixed income instruments  | 3,625,692  | 1,151,246  |
| Total cash and cash equivalents | 40,004,787 | 1,964,417  |

b) The detail of Term deposits is as follows:

The accompanying notes are an integral part of these consolidated interim financial statements.

c) The detail of Other fixed income instruments is as follows:

|  |                  |  |                           |          |                        | Investment amount |            |  |
|--|------------------|--|---------------------------|----------|------------------------|-------------------|------------|--|
| Company name                                 | Abbreviated name | Financial institution name                         | Financial instrument name | Currency | Risk<br>classification | 06-30-2022        | 12-31-2021 |  |
|  |                  |  |                           |          |                        | ThCLP\$           | ThCLP\$    |  |
| Sociedad de Transmisión Austral S.A.         | STA              | Banco Estado S.A. Administradora General de Fondos | Mutual funds              | CLP      | AA+fm/M1(cl)           | 694,762           | -          |  |
| Línea de Transmisión Cabo Leones S.A.        | CABO LEONES      | Banco Estado S.A. Administradora General de Fondos | Mutual funds              | CLP      | AA+fm/M1(cl)           | 321,350           | -          |  |
| Sistema de Transmisión del Norte S.A.        | STN              | Banco Estado S.A. Administradora General de Fondos | Mutual funds              | CLP      | AA+fm/M1(cl)           | 1,600,817         | 567,121    |  |
| Sociedad Austral de Transmisión Troncal S.A. | SATT             | Banco Estado S.A. Administradora General de Fondos | Mutual funds              | CLP      | AA+fm/M1(cl)           | -                 | 584,125    |  |
| Sistema de Transmisión del Sur S.A.          | STS              | Banco Estado S.A. Administradora General de Fondos | Mutual funds              | CLP      | AA+fm/M1(cl)           | 1,008,763         | -          |  |
| Other fixed rate instrument - total          |                  |  |                           |          |                        | 3,625,692         | 1,151,246  |  |

Other fixed income instruments correspond to a portfolio of fixed income instruments, such as mutual funds, time deposits of less than three months from the date of the investment, which are taken out by the Company and its subsidiaries to maximize returns on cash surpluses, without exceeding the level of risk and maximum exposure as defined by Management.

These instruments are held to meet short-term payment commitments and they are easily convertible into given amounts of cash and are subject to a low risk of change in value. Such instruments accrue market interest for these types of operations and are not subject to restrictions.

d) The detail by currency type of cash and cash equivalents is as follows:

| Detail of Cash and cash equivalent  | Currency | 06-30-2022 | 12-31-2021 |  |
|-------------------------------------|----------|------------|------------|--|
| Detail of Cash and Cash equivalent  | Currency | ThCLP\$    | ThCLP\$    |  |
| Amount of cash and cash equivalents | CLP      | 5,890,419  | 1,908,780  |  |
| Amount of cash and cash equivalents | USD      | 34,114,368 | 55,637     |  |
| Total, Detail by type of currency   |          | 40,004,787 | 1,964,417  |  |

e) The following table details the changes in liabilities arising from financing activities of the Company, including those changes that represent cash flows and changes that do not represent cash flows as of Thursday, June 30, 2022, and December 31, 2021.

|  |                                       |                        |                        | Cash flows          |                        |                           |   | Changes other than cash          |                                       |  |                   |                      |                                       |
|--|---------------------------------------|------------------------|------------------------|---------------------|------------------------|---------------------------|---|----------------------------------|---------------------------------------|--|-------------------|----------------------|---------------------------------------|

(\*) In mid-2019 the National Energy Commission (CNE) began the process of valuation of transmission facilities, quadrennium 2020 - 2023, which includes national, zonal and dedicated transmission facilities for the use of regulated customers with date of entry into operation until December 2017. For this purpose, it hired 2 consultants, who issued a report that was the basis for the CNE's technical reports. In August 2021 the (CNE) published the Final Technical Report, which is the result of partial reports and observation stages of the transmitting companies.

In 2020, when the new period that would change the transmission valuation for the period 2020 - 2023 began, the Company estimated that it would decrease with respect to the previous decree due to assumptions of lower profitability, lower recognition of land use rights and environment, lower recognition of COMA, among others.

Although the transmission valuation decreased with respect to the previous decree, it was higher than the estimates made by the Company in 2020, so the update of its value in the third quarter meant a greater provision for retroactive revenues from January 2020, which are expected to be recovered in a period exceeding 12 months and amounting to ThCLP\$19,703,553 (discounted value) of the subsidiary Nueva STS at June 30, 2022, considering the tariffs published in the ITD of June 2022. As of December 31, 2021, the value of the revenue provision amounts to ThCLP\$10,750,928 (discounted value) considering the tariffs published in the August 2021 ITF.

## 8.2 Balances and transactions with related companies

Transactions between the Company and its subsidiaries occur in the normal operations of its line of business, both in terms of objective and the terms and conditions. These transactions have been eliminated in the process of consolidation and are not included in this note.

Among the main transactions between related companies include the purchase and sale of electricity and tolls. The prices of electricity in these operations are set by the authorities or by the market, and the tolls are controlled by the sector's regulatory framework.

The purchase and sale of materials is performed at average warehouse prices.

Inter-company loans are regulated within a framework of consolidated cash management, which falls mainly to the subsidiaries Saesa, Frontel and the Company, in charge of defining the optimal flows between related

parties. Management has established that these loans will be due in a period of more than 12 months. Current account loans pay market interest. These loans have amount limits between companies, as indicated in the bond contracts, which are periodically monitored and have been fully complied with at the closing date of the Interim Consolidated Financial Statements (see note 27).

At the date of these Consolidated Interim Financial Statements, there are no guarantees furnished on the balances with related companies, or impairment provisions for them.

The balances of unconsolidated receivables and payables between the Company and its related companies are as follows:

#### 8.3 Board of Directors and Key Management Personnel

The Company and its subsidiaries are managed by a Board of Directors composed of eight members, who remain in office for a period of two years and may be re-elected.

At the Company's Ordinary Shareholders' Meeting held on April 27, 2022, the Company's Board of Directors was renewed, electing Jorge Lesser García-Huidobro, Iván Díaz-Molina, Juan Ignacio Parot

Becker, Waldo Fortín Cabezas, Stacey Purcell, Ashley Munroe, Christopher Powell and Jonathan Reay as Directors for a period of two years.

At its meeting held on May 11, 2022, the Company's Board of Directors elected Mr. Jorge Lesser García-Huidobro as Chairman of the Board and Mr. Iván Díaz-Molina as Vice Chairman.

As of June 30, 2022, the Board of Directors of the Company is composed of Mr. Jorge Lesser García-Huidobro, Mr. Iván Díaz-Molina, Mr. Juan Ignacio Parot Becker, Mr. Waldo Fortín Cabezas, Mr. Stacey Purcell, Mr. Ashley Munroe, Mr. Christopher Powell and Mr. Jonathan Reay.

## a) Accounts receivable and payable and other transactions with the Board of Directors

As of June 30, 2022, and 2021, there are no pending balances payable between the Company and its respective Directors by concept of Directors' Compensation.

There are no balances payable or receivable pending with the Directors for other concepts.

#### b) Compensation of the Board of Directors

As stipulated in Article 33 of the Law on Corporations No. 18.046, the fees of the Board of Directors are set every year in the Company's Ordinary Shareholders' Meeting.

The Directors are not compensated for carrying out their roles.

The Directors Messrs. Iván Díaz-Molina, Jorge Lesser García-Huidobro, Juan Ignacio Parot Becker, Waldo Fortín Cabezas, Stacey Purcell, Ashley Munroe, Jonathan Reay and Christopher Powell waived the remuneration that would correspond to them for the position of Directors of the Company.

#### c) Compensations of key Management personnel

The Company has no executive officers directly compensated by it.

#### 9 Current Tax Assets and Liabilities

The detail of current tax receivables as of June 30, 2022, and December 31, 2021 is as follows:

| Current tax assets                   | 06-30-2022 | 12-31-2021 |
|--------------------------------------|------------|------------|
| Current tax assets                   | ThCLP\$    | ThCLP\$    |
| Recoverable income tax               | 629,040    | 7,429      |
| Recoverable VAT credit, remanent (1) | 8,503,136  | 7,584,246  |
| Credit for absorbed earnings         | 1,131,188  | -          |
| Sence Credit                         | -          | 33,493     |
| Fixed asset credit                   | 28,779     | 348        |
| Recoverable tax previous year        | 529,819    | 297,315    |
| Total                                | 10,821,962 | 7,922,831  |

(1) Corresponds mainly to VAT tax credit for construction of major works of the subsidiaries, SATT and STC.

The detail of the accounts payable for current taxes as of June 30, 2022, and December 31, 2021 is as follows:

| Current tax liabilities | 06-30-2022 | 12-31-2021 |
|-------------------------|------------|------------|
| Current tax Habilities  | ThCLP\$    | ThCLP\$    |
| Income tax              | 2,452,700  | 823,507    |
| Vat Tax Debit           | 891,819    | 620,090    |
| Others                  | 41,495     | 35,364     |
| Totales                 | 3,386,014  | 1,478,961  |

#### 10 Intangibles other than Goodwill

The detail of this item as of June 30, 2022, and December 31, 2021, is as follows:

| Intangible Assets, Net                 | 06-30-2022 | 12-31-2021 |

The easements and water rights are stated at cost and those acquired after the date of transition to historical costs. The period for exercising such rights generally has no expiration date, so they are considered to be assets with an indefinite useful life and, consequently, are not subject to amortization.

Software or computer programs and licenses are amortized using the straight-line method over 4 to 6 years. The amortization of these assets is presented in "Depreciation and Amortization Expenses" in the Statement of Comprehensive Income.

Intangible assets associated with customer contracts of the Tolchén subsidiary are amortized on a straight-line basis over 25 years, according to the duration of the toll contracts.

During 2021, the increase in Intangible assets other than goodwill, is explained by the increase in identifiable intangible assets of (ThCLP\$6,233 million), caused by the valuation of the toll contracts included in the purchase of the company Tolchén.

In the purchase allocation process, the book values of Tolchen's assets and liabilities were reviewed, and intangible assets at fair value linked to contracts with wind farms, San Gabriel, Tolpán, El Alba and Los Olmos were identified.

## 11 Goodwill

The detail of goodwill as of June 30, 2022, and December 31, 2021, is as follows:

| Taxpayer ID  | Company                               | 06-30-2022 | 12-31-2021 |
|--------------|---------------------------------------|------------|------------|
| Тахраует і   | Сопірапу                              | ThCLP\$    | ThCLP\$    |

| Total        |                                       | 76,972,231 | 76,854,698 |

Due to the requirements of Law No. 21.194, which seeks that distribution companies have an exclusive line of business, on December 31, 2020 when the distribution companies of Grupo Saesa, Sociedad Austral de Electricidad S.A. (Saesa S.A.) and Empresa Eléctrica La Frontera S.A. (Frontel) were divided and transferred their transmission assets to the new companies Saesa Transmission S.A. (New STS) and Frontel Transmisión S.A. (Frontel TX), respectively, the purchased capital gains associated with the Transmission business were included in the division process.

i. Sociedad Austral de Electricidad S.A. transferred the goodwill associated with the transmission assets in the split-up process. The subsidiary Sistema de Transmisión de Sur (formerly STS) has an assigned goodwill of ThCLP\$64.000.000 from the acquisition of Grupo Saesa (indirect parent company of Sociedad de Transmisión Austral S.A.) by OTTPP (Ontario Teachers' Pension Plan) and a part of the goodwill reassigned from Saesa S.A. for ThCLP\$2.109.123 associated with transmission assets.

- ii. Empresa Eléctrica de la Frontera S.A. transferred in the split up process a part of the capital gain of Frontel S.A. related to its transmission assets (ThCLP\$9.609.528).
  - The goodwill purchased related to Empresa Eléctrica de la Frontera S.A., Tax ID 96.956.660-5, by ThCLP\$7.883.969 corresponds to the excess paid arising from the purchase of the shares of that Company, carried out in 2001. Subsequently, the purchased Company was absorbed by its corresponding parent company, which came to have the same name as the absorbed Company, leaving the Goodwill.

The purchased goodwill recognized by Sociedad Empresa Eléctrica de la Frontera S.A., formerly Frontel, Tax ID 96.986.780-k, for ThCLP\$1.725.559 corresponds to the amount paid in excess of the fair value of the assets acquired through Inversiones Eléctricas del Sur Dos Ltda., in July 2008.

Through a corporate restructuring, a cascade effect of the purchased capital gains mentioned in the previous paragraph was generated, which was finally incorporated into the Company.

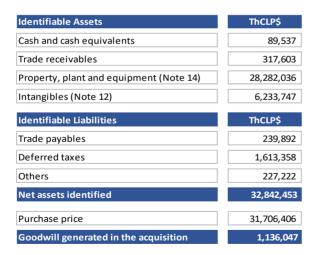

iii. The goodwill purchased related to Tolchén Transmisión SpA, Tax ID 77.122.643--4, corresponds to the amount paid in excess of the fair value of the assets acquired originating from the purchase of the shares made in July 2021.

The summary of the Statement of Financial Position of the acquired Company, including the allocation of the fair value evaluated by the Company at the date of purchase, is presented below (figures without incorporating the capital gain generated in the acquisition):

(\*) Current and non-current liabilities correspond mainly to accounts payable with related parties, which were settled as part of the transaction and included in the price paid by the subsidiary STA.

The detail of the fair value of the net assets acquired as of July 9, 2021, and Goodwill is as follows:

In accordance with the estimates and projections available to the Company's Management, the projections of the cash flows attributable to the Cash Generating Units or groups of them to which the different capital gains are assigned allow their value to be recovered.

# 12 Property, plant, and equipment

Below are the balances of the item as of Thursday, June 30, 2022, and December 31, 2021:

The Company and its subsidiaries have maintained a policy of doing everything necessary to meet growing demand, preserve the condition of the facilities and adapt the system to technological improvements, with a view to complying with the standards of quality and continuity of the supply stipulated by current regulations.

#### Additional Information on Property, Plant and Equipment

- a) Depreciation of property, plant and equipment is presented in the item "Expenses for Depreciation and Amortization of Operating Income".
- b) The Company and its subsidiaries have risk insurance coverage for their property, plant, and equipment (power stations, substations, constructions, contents, and inventories), except for the power transmission lines and power grid. The above insurance coverage is effective for 12 to 14 months.
- c) The amount of property, plant and equipment fully depreciated as of June 30, 2022, and December 31, 2021, is not significant. The Company and its subsidiaries do not have any significant amount of assets not in service or withdrawn from active use.

# 13 Non-current assets or groups of assets for disposal classified as held for sale or held for distribution to owners

In the context of the reorganization process that the SAESA Group companies are carrying out as a result of the enactment of Law No. 21.194 that modified the General Law of Electric Services, establishing a legal obligation of exclusive business for energy distribution companies electrical. At the Group level, the actions described in note 1 have been carried out with the objective of complying with the legal obligation of exclusive business and grouping all the transmission companies of the Saesa Group as direct subsidiaries of STA, which meant that within the restructuring process the SGA and Sagesa companies that have the lines of Marketing and Generation had to be temporarily included respectively.

On September 27, 2021, the Company began an international bond placement process under rule 144A/REG-S in order to refinance all the intercompany debt held by the transmission companies and obtain financing for new projects. Considering the market conditions and the type of risk of the transmission business, the placement of this bond will be destined only to finance the transmission subsidiaries of STA, excluding the commercialization and generation businesses of SGA and SAGESA, which have not yet been divested.

According to the above, at the time of the placement of the Bond there was a formal commitment with the potential bondholders, where STA will divest itself of the subsidiaries SGA and Sagesa through a new restructuring process planned for the period 2022, It is for this reason that both subsidiaries have been reclassified and presented within the group of assets and liabilities held for distribution to owners as detailed in note 13.

a) The detail of the current and non-current balances of this asset as of June 30, 2022, and December 31, 2021, is as follows:

| Increase (decrease) for deferred taxes in profit or loss             | 12,925,829  | 8,412,655  | 7,489,445   | 10,193,650 |
| Increase (decrease) for deferred taxes in other comprehensive income | 30,349      | (125,329)  | -           | -          |
| Increase (decrease) due to exchange difference                       | (9,327,949) | 2,969,974  | (5,857,450) | 4,083,952  |
| Other increases (decreases)  | -           | -          | -           | 10,598,888 |
| Total movements  | 3,628,229   | 11,257,300 | 1,631,995   | 3,678,714  |
| Final balance  | 32,739,000  | 29,110,771 | 57,504,721  | 55,872,726 |

Recovery of the deferred tax asset balances depends on obtaining sufficient tax profits in the future. Management of the Company and subsidiaries considers that projections of future profits of the various companies making up the Group are sufficient to recover these assets.

The Company and its subsidiaries are domiciled in Chile, so the local regulations in force apply equally to all of them.

# 15 Other financial assets and liabilities, current

a) The detail of current and non-current balances as of June 30, 2022, and December 31, 2021, is as follows:

| Total   | 8,712,699  | 724,835    | 491,960,284 | 125,340,559 |

**b)** The breakdown by currencies and maturities of the Obligations with the public Bonds as of June 30, 2022, and December 31, 2021, is as follows:

The accompanying notes are an integral part of these consolidated interim financial statements.

#### 15.1 Derivative instruments

The Company and its subsidiaries, following their financial risk management policy, may enter into derivative contracts to hedge their exposure to interest rate and currency variation (exchange rate).

Currency derivatives are used to determine the exchange rate of a currency in relation to the functional currency of the Company or its subsidiaries as a result of existing or future obligations. Interest rate derivatives are used to set or limit the variable interest rate of financial obligations. These instruments normally correspond to Cross Currency Swaps.

a) The amounts recorded as of June 30, 2022, and December 31, 2021, is as follows:

- (\*) Presented in the account Other financial assets current
- (\*\*) Presented in the account Other financial liabilities current

## 16 Trade and Other Accounts Payable

The details of this item as of June 30, 2022, and December 31, 2021, is as follows:

#### 17.2 Fair value of financial instruments

#### a) Fair value of financial instruments accounted for at amortized cost

The following summarizes the fair values of the main financial assets and liabilities, including those that are not presented at fair value in the Statement of Financial Position.

|  | 06-30-         | -2022       |
|--|----------------|-------------|
| Financial assets   | Carrying value | Fair value  |
|  | ThCLP\$        | ThCLP\$     |
| Investments held at amortized cost   |                |             |
| Cash on hand   | 100            | 100         |
| Balance in banks   | 2,794,288      | 2,794,288   |
| Trade debtors and other current and non current accounts receivable        | 41,402,474     | 41,402,474  |
|  |                |             |
|  | 06-30-         | -2022       |
| Financial liabilities  | Carrying value | Fair value  |
|  | ThCLP\$        | ThCLP\$     |
| Financial liabilities held at amortized cost                               |                |             |
| Other current and non-current financial liabilities (bonds)                | 498,834,007    | 404,793,283 |
| Liabilities for current and non-current leases                             | 2,221,820      | 2,221,820   |
| Trade accounts payable and other accounts payable, current and non-current | 21,110,477     | 21,110,477  |

#### b) Methodology and Assumptions Used in Calculating Fair Value

The fair value of financial assets and liabilities was determined using the following methodology:

- Trade accounts and other current accounts receivable, trade accounts payable and other accounts
  payable correspond to receivables mainly associated with energy sales and tolls, which have a shortterm collection horizon, and on the other hand, they do not have a formal market where they are
  traded. Accordingly, valuation at cost or amortized cost is a good approximation of fair value.
- The fair value of the bonds and the bank was determined based on market price references, since
  these instruments are traded in the market under standard conditions and with a high degree of
  liquidity.

#### c) Recognition of Fair Value Measurements in the Consolidated Interim Financial Statements:

Fair value hierarchy levels 1 to 3 are based on the degree to which the fair value is observable:

- Level 1: fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2: fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)
- Level 3: fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

#### 18 Other Non-Financial Liabilities

The details of this item as of June 30, 2022, and December 31, 2021, is as follows:

|                                      | Curr       | ent        | Non cu     | ırrent     |
|--------------------------------------|------------|------------|------------|------------|

## 19 Equity

# 19.1 Net equity of the Company

# 19.1.1 Subscribed and paid-in capital

As of June 30, 2022, the issued capital of the Company amounts to ThCLP\$166.064.578. The capital is represented by 620.093.318 series A shares (subscribed and all paid) and 38.352.069.948.752 series B shares, of which 12.990.630.008 are subscribed and pending payment (12.401.271.096 Grupo Saesa and 589.358.912 other non-controlling interest).

On December 28, 2021, at the Company's Extraordinary Shareholders' Meeting, it was agreed to increase the Company's capital for an amount of ThCLP\$106,292,019, through the issuance of 20.343,540,014,041 series B shares.

Said capital increase was subscribed and paid by Inversiones Eléctricas del Sur S.A. through the total contribution of the shares owned by Sistema de Transmisión del Sur S.A. (New STS).

The series A shares have all the rights that the current regulations confer on ordinary shares. On the other hand, series B shares have all the rights that current legislation confers on ordinary shares, but that have the preference to call meetings of shareholders (they will have the privilege of convening ordinary and extraordinary shareholders' meetings, when requested, at least, 5% of these shares) and the limitation to elect Directors (they will not have the right to elect Directors.

#### 19.1.2 Other reserves

On December 28, 2021, in the context of the reorganization process that the SAESA Group companies are carrying out as a result of the enactment of Law No. 21.194 that modified the General Electric Services Law, the company carried out a capital increase through the exclusive issuance of new Series B shares. Said capital increase was subscribed and paid by Inversiones Eléctricas del Sur S.A. through the total contribution of the shares owned by Sistema de Transmisión del Sur S.A. (New STS). With this, the transfer of the shares of New STS from Eléctricas to STA was 10,078,417,668.726 shares distributed in 416,201,830 Series A shares and 10,078,001,466.896 Series B shares. These resulted in an adjustment in other reserves of ThCLP\$154,339,821. As it is an operation between related parties, the effects that originate must form part of the equity. Under this guideline, the company reclassified this effect in other reserves.

(\*) On December 1, 2021, the merger was carried out by incorporating the transmission companies' Former STS, Frontel Transmisión into (New STS), leaving the new Company as legal successor. After the merger, the company was renamed Sistema de Transmisión del Sur S.A. or STS (New STS). This merger gave rise to a tax gain that gave rise to a deferred tax asset of ThCLP\$12,063 million. As it is an operation between related parties, the effects that originate must form part of the equity. Under this guideline, the company reclassified this effect in other reserves.

#### 19.1.3 Translation Differences

The detail of the subsidiaries and related companies that present translation differences net of taxes as of June 30, 2022, and 2021, is as follows:

| Accumulated translation differences          |             | 06-30-2022  | 06-30-2021  |
|--|-------------|-------------|-------------|
| Accumulated translation differences          | ThCLP\$     | ThCLP\$     |             |
| Sociedad Generadora Austral S.A.             | SGA         | 4,655,679   | 2,228,280   |
| Sagesa S.A.                                  | SAGESA      | 14,256,709  | 6,290,630   |
| Sistema de Transmisión del Centro S.A.       | STC         | 5,591,809   | (1,378,704) |
| Sistema de Transmisión del Norte S.A.        | STN         | 8,350,338   | 1,675,192   |
| Sociedad Austral de Transmisión Troncal S.A. | SATT        | 6,206,867   | 415,586     |
| Línea de Transmisión Cabo Leones S.A.        | CABO LEONES | 1,078,702   | (2,294)     |
| Sociedad de Transmisión Austral S.A.         | STA         | (7,879,710) | 1,086,141   |
| Tolchén Transmisión SpA                      | TOLCHÉN     | 348,254     | -           |
| Total  |             | 32,608,648  | 10,314,831  |

The translation reserve comes from exchange differences that arise from the conversion of the subsidiary which have functional currency dollar.

## 19.1.4 Retained Earnings

Retained Earnings balances as of June 30, 2022, and 2021 are as follows:

| Movements Accumulated Gains (losses)                    | Accumulated distributable earnings | Total        |
|---|------------------------------------|--------------|
|   | ThCLP\$                            | ThCLP\$      |
| Opening balance as of 01-01-2022                        | 35,638,738                         | 35,638,738   |
| Gain attributable to owners of the controlling interest | 5,978,025                          | 5,978,025    |

# 26 Sureties Obtained from Third Parties

As of June 30, 2022, and 2021, the Company and its subsidiaries has received guarantees from clients, suppliers and contractors guaranteeing, primarily, performance under power supply contracts, works to be performed and advance payments for ThCLP\$13,121,613 and ThCLP\$10,605,496, respectively.

#### 27 Comments and restrictions

Subsidiary STS's bond issue contracts impose obligations in addition to the payment obligations, including financial ratios of various types over the term of these contracts.

STS must report quarterly on compliance with these ratios. As of June 30, 2022, STS is in compliance with all the financial ratios required in those contracts and complies with the aforementioned covenants.

On January 10, 2019, the STS (the "Company") placed the Series A bonds, for a total amount of UF 4,000,000, with the following main restriction, maintain at the end of each quarter, a combined adjusted EBITDA / Net Financial Expenses not exceeding 6.75, which will be measured using the financial statements of the Company.

As of June 30, 2022, and December 31, 2021, the subsidiary STS complies with the covenants stipulated in their financial contracts.

STA bonds do not maintain any financial covenants.
