SOCIEDAD DE TRANSMISIÓN AUSTRAL S.A. AND SUBSIDIARIES Notes to the Consolidated Interim Financial Statements As of June 30, 2024 (unaudited) (In thousands of Chilean pesos – ThCLP\$)

1. Information and business description

a) General Information

At the Extraordinary Shareholders' Meeting of Sociedad Austral de Electricidad S.A., hereinafter "SAESA", held on December 18, 2019, it was agreed to divide it into the legal successor, which maintained the same corporate name and a new company, named "Sociedad de Transmisión Austral S.A.", hereinafter "STA" or the Company.

At the Extraordinary Shareholders' Meeting of SAGESA S.A. (hereinafter "Sagesa Tx") held on December 30, 2022, the demerger of said company into two companies was agreed: (a) the successor, which maintained the company name and will retain the interest in the subsidiary Línea de Transmisión Cabo Leones S.A. (hereinafter "Cabo Leones") and the transmission assets; and (b) a new company, called "Sagesa Generación S.A." (hereinafter "Sagesa Gx"), to which the assets corresponding to SIC and PMGD plants were assigned.

At the Extraordinary Shareholders' Meeting of the Company held on January 3, 2023, it was agreed to divide the company into two entities: (a) the successor, which maintained the company name and will retain the interest in the transmission business; and (b) a new company, called STA II S.A., to which the stake that Sociedad de Transmisión Austral S.A. held in SGA and in Sociedad Generadora Austral S.A. (hereinafter "SGA") and Sagesa Gx. was assigned.

The subsidiary companies registered in the Register of Reporting Entities are Sistema de Transmisión del Sur S.A., (hereinafter "STS"), registered under number 1200 and Sociedad Austral de Transmisión Troncal S.A., (hereinafter "SATT"), registered under number 435.

The subsidiary company registered in the Register of Reporting Entities is Sociedad Austral de Transmisión Troncal S.A., SATT, registered under number 435.

The non-registered subsidiary companies are Sistema de Transmisión del Norte S.A. (hereinafter "STN"), Sistema de Transmisión del Centro S.A. (hereinafter "STC"), Sagesa Tx., Cabo Leones and Tolchén Transmisión SpA (hereinafter "Tolchén").

The Company is a direct subsidiary of Inversiones Eléctricas del Sur S.A. This is the company through which the Canadian fund Ontario Teachers' Pension Plan Board and the Canadian fund Alberta Investment Management Corporation (AIMCo) controls Saesa Group companies and of which the Company is a part.

The legal address of the Company is Isidora Goyenechea 3621, floor 3, Santiago, and the main commercial address is Bulnes 441, Osorno.

b) Business information

As of June 30, 2024, the present consolidated Interim financial statement shows a negative working capital primarily due to the amounts of financing accounts with third parties and related parties. However, the cash flow from operating activities is positive. The Company continuously monitors its cash flow projections and has the commitment from its related parties and parent company to finance ongoing projects when necessary. Based on its evaluation of the prospects and viability of the Company, the Management has determined at the time of approving the consolidated Interim financial statements that there are no material uncertainties that raise doubts about the Group's Going Concern assumption.

The object of the Company is to carry out business related mainly to the transmission of energy through its own or other companies, as well as to carry out and manage investments. The Company's activities that make up its corporate purpose may be carried out in the country or abroad. The Company currently manages the investments of its subsidiaries STN, SATT, STC, Tolchén, STS and SAGESA.

The subsidiary STN, whose main line of business is the construction, operation and maintenance of facilities for the transmission or transport of energy, operates a dedicated transmission system in the Antofagasta Region, whose purpose

The Subsidiary SATT whose main line of business is the construction, operation, maintenance and management of electric power transmission or transportation facilities operates Dedicated Transmission, Zonal and National assets located in Copiapó, Tocopilla and Araucanía.

The subsidiary Tolchén has a dedicated 33 km long dual-circuit transmission line with a capacity of 233 MVA per circuit and are used by wind farms. The first circuit runs from the San Gabriel substation to the Mulchén substation, and the second circuit runs from the Tolpán Sur substation to the Mulchén substation. Both circuits are located in the cities of Renaico and Mulchén, provinces of Malleco and Bio Bio, belonging to the regions of Araucanía and Bio Bio, respectively.

The subsidiary STS develops mainly transmission business in the Bío Bío, Araucanía, Los Ríos, and Los Lagos regions; in addition to the rendering of services in all the special areas of expertise related to the electrical transportation and transformation systems, such as advisories in the design, construction, maintenance and operation of the systems.

The subsidiary Sagesa Tx is a company that emerged from the corporate division process of Sagesa Gx mentioned earlier, which retains the company name and keeps the Transmission assets and the interest in the subsidiary Cabo Leones.

The indirect subsidiary Cabo Leones, also in the Dedicated Transmission System, corresponds to a double circuit line of 220 KV, located in the communes of Freirina and Vallenar, which aims to evacuate the electricity and power of up to three wind projects under construction. It entered into operation in December 2017.

In the context of the reorganization process being carried out by SAESA Group companies as a result of the enactment of Law No. 21.194 which amended the General Electrical Services Law, establishing a legal obligation of exclusive line of business for energy distribution companies. At the Group level, the following actions have been carried out since 2019 onwards, with the objective of complying with the legal obligation of exclusive business.

- On January 3, 2023, STA was divided into two companies: (a) the successor, which maintained the company name and will retain the interest in the transmission business; and (b) a new company, called STA II S.A., to which the stake that Sociedad de Transmisión Austral S.A. held in SGA and in Sagesa Gx was assigned.
- On December 30, 2022, Sagesa Tx was divided into two companies: (a) the successor, which maintained the company name and will retain the interest in the subsidiary Cabo Leones and the transmission assets; and (b) a new company, called "Sagesa Generación S.A.", to which the assets corresponding to SIC and PMGD plants were assigned.

2. Summary of significant Accounting Policies

2.1 Accounting policies

These Consolidated Interim Financial Statements are presented in thousands of Chilean pesos, and they were prepared based on the accounting records kept by the Company and its Subsidiaries. The policies and criteria have been consistently applied by all the subsidiaries.

The accompanying Consolidated Interim Financial Statements of the Company and its subsidiaries ended as of June 30, 2024, and December 31, 2023, have been prepared in accordance with International Financial Reporting Standards (hereinafter "IFRS") issued by the International Accounting Standards Board (hereinafter "IASB"). For these purposes, the IFRS comprise standards issued by the International Accounting Standards Board ("IASB") and the interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

These Consolidated interim Financial Statements have been approved by the Board at its meeting held on Septembre 12, 2024.

2.2 Responsibility for the Information and Use of Estimates

The Company's Management is responsible for the information contained in these Consolidated Interim Financial Statements.

The preparation of the accompanying Consolidated Interim Financial Statements requires the use of certain estimates and assumptions by Management. These estimates are based on management's best knowledge of the reported amounts, events or shares as of the date of issuance of these Consolidated interim Financial Statements. However, it is possible that events in the future may require them to be adjusted (upwards or downwards) in future periods, which would be done, in accordance with IAS 8, on a prospective basis, recognizing the effects of the change in Future Consolidated Interim Financial Statements. The detail of the significant accounting estimates and criteria is detailed in Note 5.

2.3 Periods covered

The current financial statements comprise the following:

- Consolidated Interim classified statements of financial position of Sociedad de Transmisión Austral S.A. as of June 30 (unaudited), 2024, and December 31, 2023.
- Consolidated Interim Statements of comprehensive income by nature for the period ended June 30, 2024, and 2023 (unaudited).
- Consolidated Interim Statements of changes in net equity for the period ended June 30, 2024, and 2023 (unaudited).
- Consolidated Interim Statements of cash flows, direct method, for the period ended June 30, 2024, and 2023 (unaudited).

2.4 Basis of preparation

The Consolidated Interim Financial Statements have been prepared under the historical cost criteria, except in the case of financial instruments, recorded at fair value.

2.5 Basis of consolidation

The Consolidated Interim Financial Statements incorporate the Financial Statements of the Company and the entities controlled by the Company (its subsidiaries). Control is achieved when the Company has:

- (a) power over investment (i.e., existing rights that give the ability to direct the relevant activities of the investee, i.e., activities that significantly affect the returns of the investee);
- (b) exposure, or rights, to variable returns from its involvement with the investee; and
- (c) ability to use its power over the investee in order to affect its performances.

When the Company has less than most of the voting rights of an investee, has power over the investee when these voting rights are sufficient to give in practice the ability to direct the relevant activities of the investee unilaterally. The Company considers all facts and circumstances to assess whether the voting rights in an investee are sufficient to give power, including:

- (a) the number of voting rights held by the investor in relation to the number and dispersion held by other holders of voting rights;
- (b) potential voting rights held by the investor, other vote holders or other parties;
- (c) rights arising from other contractual arrangements; and

(d) any additional facts and circumstances indicating that the investor has or does not have, the current ability to direct the relevant activities at the time these decisions need to be taken, including patterns of voting behavior in previous shareholders' meetings.

The Company will reassess whether it has control over an investee if facts and circumstances indicate that there have been changes in one or more of the three control elements mentioned above.

The consolidation of a subsidiary starts from the date the investor obtains control of the investee and will cease when it loses control over it. Specifically, the income and expenses of an acquired or sold subsidiary during the year are included in the Consolidated interim Statement of Comprehensive Income from the date on which the Company obtains control until the date on which the Company ceases to control the subsidiary.

Gain or loss of each component of other comprehensive income is attributed to owners of the Company and the noncontrolling interest, as applicable. Total comprehensive income is attributed to owners of the Company and noncontrolling interests, even if the result of the non-controlling interests has a deficit balance.

If a subsidiary uses accounting policies other than those adopted in the Consolidated Interim Financial Statements for transactions and other similar events under similar circumstances, appropriate adjustments will be made in the Financial Statements of the subsidiaries in preparing the Consolidated Interim Financial Statements to ensure compliance with accounting policies of the Company.

All assets and liabilities, equity, revenues, expenses and cash flows relating to transactions between group companies are eliminated in consolidation.

The detail of the subsidiary companies, which have been consolidated in these Consolidated interim Financial Statements, is as follows:

| | | | | | | Ownership | Interest % | |
|--------------|--|---------------------|---------|------------------------|-----------|------------|------------|-----------|
| Taxpayer ID | Company name | Abbreviated name | Country | Functional currency | | 06-30-2024 | 12-31-2023 | |
| | | | | , | Direct | Indirect | Total | Total |
| 77.312.201-6 | Sistema de Transmisión del Sur S.A. | STS | Chile | Chilean peso | 99.9996% | 0.0004% | 100.0000% | 100.0000% |
| 76.186.388-6 | Sagesa S.A. | SAGESA Tx | Chile | US dollar | 99.8987% | 0.1000% | 99.9987% | 99.9987% |
| 76.410.374-2 | Sistema de Transmisión del Norte S.A. | STN | Chile | US dollar | 100.0000% | 0.0000% | 100.0000% | 100.0000% |
| 76.440.111-5 | Sistema de Transmisión del Centro S.A. | STC | Chile | US dollar | 100.0000% | 0.0000% | 100.0000% | 100.0000% |
| 76.519.747-3 | Sociedad Austral de Transmisión Troncal S.A. | SATT | Chile | US dollar | 100.0000% | 0.0000% | 100.0000% | 100.0000% |
| 76.429.813-6 | Línea de Transmisión Cabo Leones S.A. | Cabo Leones | Chile | US dollar | 99.9900% | 0.0100% | 100.0000% | 100.0000% |
| 76.389.448-7 | Tolchén Transmisión SpA | Tolchén | Chile | US dollar | 100.0000% | 0.0000% | 100.0000% | 100.0000% |

Non-controlling interest – A parent company will present the non-controlling interests in the Consolidated Interim Statement of Financial Position, within equity, separately from the equity of the owners of the parent company.

Changes in the Company's ownership interest in a subsidiary that do not result in a loss of control over subsidiaries are accounted for as equity transactions. The carrying amounts of the participation of the Company and the controlling interests are adjusted to reflect the change in their relative interests in the subsidiaries. Any difference between the amount for which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to the owners of the Company.

2.6 Business combination

Business combinations are accounted using the purchase method. This involves the recognition of identifiable assets (including previously unrecognized intangible assets) and liabilities (including contingent liabilities and excluding future restructurings) of the business acquired at fair value. If these business combinations involve acquiring control of an investment in which the Company had significant influence or joint control, such prior participation is recorded at fair value by recognizing the effect on results.

2.7 Functional and reporting currency

a) Functional currency

The functional currency of each entity in the Group has been determined as the currency of the main economic environment in which it operates. Transactions other than those performed in the entity's functional currency are translated at the exchange rate in effect on the date of the transaction. Assets and liabilities denominated in currencies other than the functional currency will be retranslated at the year-end exchange rates. Gains or losses from remeasurement will be included in net gains or losses in other financial items.

The Company's functional currency of the subsidiaries are distributed as follows:

| Company | Abbreviated name | Functional currency |
|--|---------------------|---------------------|
| Sistema de Transmisión del Sur S.A. | STS | Chilean peso |
| Sagesa S.A. | SAGESA Tx | US dollar |
| Sistema de Transmisión del Norte S.A. | STN | US dollar |
| Sistema de Transmisión del Centro S.A. | STC | US dollar |
| Sociedad Austral de Transmisión Troncal S.A. | SATT | US dollar |
| Línea de Transmisión Cabo Leones S.A. | Cabo Leones | US dollar |
| Tolchén Transmisión SpA | Tolchén | US dollar |

b) Reporting currency

The entity's reporting currency is the Chilean peso, as it corresponds to the currency of the Group's parent company, Inversiones Eléctricas del Sur S.A. and that it is the currency that best represents the economic environment in which the aforementioned Parent Company operates.

The conversion procedure used when the reporting currency is different from the functional currency is as follows:

- The assets and liabilities of each of the statements of financial position, using the exchange rate in force on the closing date of the corresponding statements of financial position;
- Income and expenses for each of the statements of comprehensive income will be translated at the exchange rates of the date of each transaction or at the average exchange rate, unless this average is not a reasonable approximation of the cumulative effect of the rates existing on the dates of the transaction; and
- The exchange differences produced in the translation of the Financial Statements will be recognized in the statement of other comprehensive income.

2.8 Basis of conversion

Transactions in a currency other than the functional currency are considered transactions in a foreign currency. Transactions in currencies other than the functional currency of each company are recorded at the exchange rates in force at the date of the transaction. During the year, any differences that arise between the balances translated at the exchange rate prevailing at the date of collection or payment are recorded as exchange differences in the Consolidated Interim Statement of Comprehensive Income.

Also, balances receivable or payable at each year-end denominated in currencies other than the functional currency of each company are translated at the year-end exchange rate. The resulting translation differences are recorded as exchange differences in the Consolidated Interim Statement of Comprehensive Income.

2.82%

3.00%

The assets and liabilities in foreign currency and in the adjustable currency (UF) are translated at the exchange rates at current values at the closing date of the Consolidated Interim Financial Statements, according to the following details:

| Foreign and adjustable currency | Abbreviated | 06-30-2024 | 12-31-2023 | 06-30-2023 |
|--|-------------|------------|------------|------------|
| | name | CLP\$ | CLP\$ | CLP\$ |
| US dollar | USD | 944.34 | 877.12 | 801.66 |
| Unidad de Fomento (Inflation index-linked unit of account) | UF | 37,571.86 | 36,789.36 | 36,089.48 |

2.9 Offsetting of balances and transactions

As a general rule, assets and liabilities, income and expenses, are not offset in the Consolidated Interim Financial Statements, unless offsetting is required or is permitted by some standard and the presentation reflects the substance of the transaction

2.10 Property, plant and equipment

Property, plant and equipment are stated at acquisition cost less accumulated depreciation and accumulated impairment.

In addition to the amount paid for the acquisition or construction of each item, cost also includes, where appropriate, the following items:

- Borrowing costs incurred during the construction period that are directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use, such as, for example, transmission or generation facilities. The interest rate used is that of specificpurpose financing or, failing that, the weighted average financing rate of the Company and its subsidiaries.
- 06-30-2024 06-30-2023 **Costs for capitalized loans** ThCLP\$ ThCLP\$ Costs for capitalized loans (see note 24) 2,749,404 2.059.987 Costs capitalization rate functional currency CLP 2.82% Costs capitalization rate functional currency USD 3.00%
- The capitalized amount and the capitalization rate are as follows:

- Personnel costs directly related to work in progress as of June 30, 2024, and 2024 amounted to ThCLP\$1,722,393, and ThCLP\$1,553,127, respectively (see note 21).
- The future costs that the Company and its subsidiaries will have to incur in respect of the closure of their facilities are capitalized as part of the cost of the asset, at present value, and a related provision is recognized. Each year, the Company and its subsidiaries review their estimate of these future costs, by increasing or decreasing the value of the asset based on the results of this estimate.

The works in progress are transferred to working assets once the test period when they become available for use has been completed, which is the starting point for their depreciation.

The existing costs of substantial expansion or improvement of structures, facilities or equipment correspond to the replacement or improvement of parts, but without replacing the entire asset, and which lead to extension of the useful life, increase in capacity, decrease in operating costs, or increase in value through the benefits associated with the asset, are incorporated as an increase in the cost of the asset. These costs also include requirements by the authorities or commitments made by the Company and its subsidiaries, and in case these are not complied with, will not allow the use of the asset.

Subsequent costs (replacement of components, improvements, extensions or expansions) are included in the value of the initial asset or are recognized as a separate asset. The value of the replaced component is derecognized.

The other maintenance and repair expenses that do not comply with the above are recognized in profit and loss for the period in which they are incurred.

Depreciation is calculated using the straight-line method over the cost of the assets less their residual value. The land on which buildings and other constructions have been built has an indefinite useful life and, therefore, is not depreciated.

The Company and its subsidiaries depreciate their fixed assets from the moment in which the assets are in conditions of use.

The residual value and the useful life of the assets are reviewed regularly, and they are adjusted prospectively, if required and if applicable.

Based on the results of impairment tests, the Company and its subsidiaries consider that the assets' carrying value does not exceed their recoverable value as of June 30, 2024, and December 31, 2023.

The main periods of useful life used for depreciation of assets are as follows:

| Property, plant and equipment | Estimated useful life range |
|----------------------------------|--------------------------------|
| Buildings | 40-80 |
| Plant and equipment | |
| Lines and networks | 30-44 |
| Transformers | 44 |
| Meters | 20-40 |
| Substations | 20-60 |
| Generation system | 25-50 |
| Information technology equipment | |
| Hardware | 5 |
| Fixtures and fittings | |
| Office furniture and equipment | 10 |
| Vehicles | 7 |
| | |
| Other equipent and tools | 10 |

To operate the distribution electrical system, the companies have concessions for distribution of electricity which are granted by the Chilean Regulatory Authority and do not have an expiration date, and, therefore, they are considered indefinite.

2.11 Research and development costs

Research costs are recognized as an expense in the year in which they are incurred. The costs incurred in development projects are recognized as intangible assets when the recognition criteria are met:

- Technically, it is possible to complete the production of the intangible asset so that it can be available for use or sale;
- Management intends to complete the intangible asset in question, to use or sell it;
- There is the ability to use or sell the intangible asset;
- It is possible to demonstrate the way in which the intangible asset will generate probable economic benefits in the future;
- There is availability of adequate technical, financial or other resources to complete the development and to use or sell the intangible asset; and
- It is possible to reliably assess the disbursement attributable to the intangible asset during its development.

Other development costs are recognized as an expense when incurred. Development costs previously recognized as a result cost are not recognized as an asset in the period or a subsequent period.

The Company and its subsidiaries are working on the search for technological solutions that allow it, among others, a remote interaction with its customers and network equipment in order to facilitate energy management, quality of service and products delivered to its users, In addition to other NCRE projects for hybrid generation in isolated systems.

With respect to the projects described above, the Company and its subsidiaries have not recorded research expenses, if they have been recorded against profit and loss.

2.12 Impairment of non-financial assets

At each reporting date, the Group reviews the carrying amounts of its property, plant and equipment and definitely-lived intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated to determine the extent of the impairment loss (if any). Where the asset does not generate cash flows that are independent from other assets, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with an indefinite useful life are tested for impairment at least annually and whenever there is an indication at the end of a reporting period that the asset may be impaired.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss.

Where an impairment loss subsequently reverses (as a result of any event defined in IAS 36), the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss to the extent that it eliminates the impairment loss which has been recognized for the asset in prior years.

Based on the results of impairment tests, the Company and its subsidiaries consider that the assets' carrying value does not exceed their recoverable value as of June 30, 2024, and December 31, 2023.

2.13 Leases

2.13.1 The Company acts as lessee:

To determine whether a contract is, or contains, a lease, the Company and its subsidiaries analyze the economic background of the agreement, assessing whether if the agreement transfers the right to control the use of an identified asset for a period in exchange for a consideration. It's considered that control exists if the client has i) the right to obtain substantially all the economic benefits from the use of an identified asset; and ii) right to direct the use of the asset.

At the beginning of the lease, right of use asset and a lease liability is recorded in the Consolidated Interim Statement of Financial Position.

The Company and its subsidiaries initially recognize the right-of-use assets at cost. The cost of the right-of-use assets includes: i) amount of the initial measurement of the lease liability; ii) lease payments made; iii) the initial direct costs incurred; and iv) the estimate of costs for decommissioning or restoration.

Subsequently, the right-of-use asset is measured at cost, adjusted by any new measurement of the lease liability, less accumulated depreciation and accumulated losses due to impairment of value.

The right-of-use asset is depreciated in the same terms as the rest of similar depreciable assets, if there is reasonable certainty that the lessee will acquire ownership of the asset at the end of the lease. If such certainty does not exist, the asset depreciates in the shortest period between the useful life of the asset or the lease term.

The lease liability is initially measured at the present value of the lease payments, discounted at the incremental loan rate of the Company and its subsidiaries, if the interest rate implicit in the lease could not be easily determined. Lease payments included in the measurement of the liability include: i) fixed payments, less any lease incentive receivable; ii) variable lease payments that depend on an index or rate; iii) residual value guarantees; iv) exercise price of a purchase option; and v) penalties for lease term.

After the beginning date, the lease liability is increased to reflect the accrual of interest and is decreased by the lease payments made. In addition, the carrying amount of the liability is measured again if there is a modification in the terms of the lease (changes in the term, in the amount of payments or in the evaluation of an option to buy or change in the amounts to be paid). Interest expense is recognized as an expense and is distributed among the periods that constitute the lease period, so that a constant interest rate is obtained in each year on the outstanding balance of the lease liability.

Short-term leases, equal to or less than one year, or low-value assets leases are excepted from the application of the recognition criteria described above, recording the payments associated with the lease as an expense in a straight-line method throughout the lease term.

2.13.2 The Company acts as lessor:

When the Company and its subsidiaries act as lessor, they classify at the beginning of the agreement whether the lease is operating or financial, based on the essence of the transaction. Leases in which substantially all risks and rewards inherent in ownership of the underlying asset are transferred are classified as financial leases.

All other leases are classified as operating leases.

In the case of financial leases, on the beginning date, the Company recognizes in its Consolidated Interim Statement of Financial Position the assets held in financial lease and presents them as an account receivable, for an amount equal to that of the net investment in the lease, calculated as the sum of the current value of the lease installments and the current value of any residual value accrued, discounted at the interest rate implicit in the lease. Subsequently, financial income is recognized throughout the term of the lease, based on a model that reflects a constant rate of return on the net financial investment made in the lease.

In the case of operating leases, lease payments are recognized as income in a linear manner during the term of the lease, unless another systematic basis of distribution is more representative. The initial direct costs incurred to obtain an operating lease are added to the carrying amount of the underlying asset and are recognized as an expense over the term of the lease, on the same basis as the income from the lease.

2.14 Financial instruments

Financial assets and financial liabilities are recognized in the Company's Statement of financial position when the Company and its Subsidiaries become a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables that do not have a significant financing component which are measured at transaction price (see revenue footnote). Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in the Consolidated Interim statement of comprehensive income.

2.14.1 Financial assets

All regular way purchases or sales of financial assets are recognized and derecognized on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognized financial assets are measured subsequently in their entirety at either amortized cost or fair value, depending on the classification of the financial assets.

a) Classification and initial measurement of financial assets

The classification and measurement criteria correspond to the following:

- i. Debt instrument at amortized cost:
 - The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
 - The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- ii. Debt instrument at fair value through other comprehensive income (FVTOCI):
 - The financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and
 - The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.
- iii. Fair value through profit and loss (FVTPL):

By default, all other financial assets are measured subsequently at fair value through profit or loss (FVTPL).

- The Group may irrevocably elect to present subsequent changes in fair value of an equity investment in other comprehensive income if certain criteria are met; and
- The Group may irrevocably designate a debt investment that meets the amortized cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

b) Subsequent measurement of financial assets

Financial assets are measured subsequent to their acquisition based on their classification as follows:

- i. In the case of financial assets initially recognized at amortized cost, they are measured using the effective interest rate method, which links estimated future cash receipts over the expected life of the financial asset.
- ii. Financial assets recognized at fair value with changes in other comprehensive income are subsequently measured at fair value. Interest income is calculated using the effective interest rate method, exchange gains and losses and impairment are recognized in results. Other net gains and losses are recognized in the statement of comprehensive income. On derecognition, gains and losses accumulated in other comprehensive income are reclassified to profit or loss for the year.
- iii. In relation to financial assets initially recognized at fair value through profit or loss, these are subsequently measured at fair value. Net gains or losses, including any interest or dividend income, are recognized in profit or loss for the year. These financial assets are held for trading and are acquired for the purpose of selling them in the short term. Financial assets in this category are classified as other current financial assets.

c) Impairment of non-derivative financial assets

For trade receivables, finance lease receivables and contract assets, the Company has applied the simplified approach in IFRS 9 to measure the expected credit loss (ECL).

Under this simplified approach, the Company has determined a provision matrix based on the historical default rates of its customers, as adjusted by prospective estimates taking into account the most relevant macroeconomic factors that affect collections and that have shown correlation with collections in the past. The macroeconomic variables are reviewed periodically. The Company identifies as the main macroeconomic variables that affect collections; the gross domestic product of the country and the regions where it is present, national and regional unemployment rates, and variations in the purchasing power of customers.

When there is reliable information that indicates that the counterpart is in severe financial difficulties and there is no realistic prospect of recovery, for example when the counterpart has been put into liquidation or has entered bankruptcy proceedings, or in the case of trade receivables, when the amounts have been deemed uncollectable, a write-off will be recorded. Previous to the write-off, all prudential means of collection have been executed.

The trade debtors are users of the transmission systems.

In relation to loans to related parties, Management has not recognized a loss allowance as the loans to related parties are considered to be of low credit risk.

2.14.2 Financial liabilities

Financial liabilities are classified as (i) at amortized cost or (ii) at fair value through profit and loss.

The Group maintains the following financial liabilities in their consolidated Interim statement of financial position classified as described below:

a) Commercial accounts payable:

Obligations with suppliers are initially recognized at their fair value, this being the value to be paid, and subsequently they are valued at their amortized cost using the effective interest rate method.

b) Obligations with banks and financial institutions.

Obligations with banks and financial institutions are initially recognized at their fair value, net of the costs incurred in the transaction.

Subsequently, they are valued at amortized cost. Any difference between the funds obtained (net of the costs necessary to obtain them) and the reimbursement value is recognized in the income statement over the life of the debt in accordance with the effective interest rate method.

2.14.3 Derivatives and hedge accounting

Derivatives are contracted to manage exchange rate, interest rate, inflation, etc. risks to which the Company may be exposed.

Derivative transactions are monitored regularly and consistently over the life of the contracts to ensure that no significant departures occur from the objectives defined, so as to satisfactorily follow the strategy adopted by Management. The Company has met the requirements for cash flow hedging for the derivative instruments entered into. Also, to meet the requirements set forth in the standard, the effectiveness during the hedging period is regularly monitored. The effectiveness of derivative transactions is monitored on a retrospective and prospective basis. Such effectiveness must be within the limits defined in IAS 39 (80% - 125%). The portion of the fair value of hedging derivatives that, under the respective methodology, turns out to be ineffective is recorded through Consolidated Interim Statements of Comprehensive Income in financial income or financial expense.

2.15 Inventories

Inventories are stated at the lower of cost and net realizable value. Cost is calculated using the weighted average cost method.

2.16 Other non-financial liabilities

This item includes the following:

2.16.1 Deferred income

These amounts are recorded as deferred income in the liabilities of the Consolidated Interim Statement of Financial Position and are charged to income under "Revenue from ordinary activities" in the Consolidated Interim Statement of Comprehensive Income to the extent that the service accrues.

In "Other Non-Current Non-Financial Liabilities" the advance payment on long-term toll contracts with third parties for the use of zonal transmission assets that the Company and its subsidiaries must construct has been included. Once the construction of the asset has been completed and the toll service for the use of the asset has commenced, the recognition of the respective income in the Company's results in the corresponding proportion and over the duration of the contract will be recorded.

2.16.2 Construction in Progress for Third Parties

The other works to third parties corresponds to electrical works that the entity builds and are billed and/or charged in advance to third parties, other than government subsidies. These generate at the beginning a liability and an account receivable equivalent. To the extent that progress is made in the construction of the work, the corresponding liability is reduced until the end of construction. The utility is recognized in proportion to the degree of progress.

The Company and its subsidiaries measure the degree of progress by differentiating according to the total budget of the work (between greater or less than ThCLP\$50.000). Under this amount the degree of progress is determined in relation to the cost incurred in the project, over this amount, the progress will be measured according to technical progress reports.

Similar transactions are considered works on ThCLP\$50.000 for having the following characteristics:

- Projects for the mass replacement of luminaries in the public lighting system, tendered through the platform "Mercado Público", whose financing may come from the Ministry of Energy, the Regional Government or the Chilean energy efficiency agency (ACHEE).
- Projects related to energy efficiency, mainly photovoltaic systems, tendered through the public market also with financing from the ministry of energy or regional government.

 Projects to clients (preferably construction companies) related to electrification of both aerial and underground subdivisions.

2.17 Provisions

The obligations existing at the date of the Consolidated Interim Financial Statements, arising as a result of past events, in the liquidation of which the Company and its subsidiaries expects to dispose of resources that imply economic benefits and in which there is uncertainty of the amount and moment of cancellation, are recorded in the Consolidated Interim Statement of Financial Position as provisions for the current value of the most probable estimated amount that the Company and its subsidiaries will have to pay to settle the obligation.

The estimates of provisions are quantified taking into account the best information available at the date of issuance of the Consolidated Interim Financial Statements, which surrounds most of the events and the circumstances that coincide with the valuation thereof.

2.18 Employee Benefits

- Short-term, long-term employee benefits and severance indemnities.

The Company and its subsidiaries recognize the amount of the benefits payables for services rendered as a liability, which is recorded at its nominal value using the accrual method and presented under trade and other payables and current provisions for employee benefits.

The costs associated with the employee benefits involving services rendered by the employees during the period are charged to profit and loss in the respective year.

- Post-employment benefits - Severance indemnities

The employment terms and conditions stipulate the payment of severance indemnities when an employment contract terminates. Usually this corresponds to a proportion of the base wage (0.9) multiplied by each year of service, always provided the employee has served for more than 10 years.

The severance indemnity is calculated according to appraisals made by an independent actuary, using the projected credit unit method, which is updated periodically. The obligation recognized in the Consolidated Interim Statement of Financial Position represents the present value of the severance indemnity. Losses and gains produced by changes in actuarial assumptions are recorded in other comprehensive income for the year.

The Company and its subsidiaries use assumptions to determine the best estimate of these benefits. Such estimates, just like the assumptions, are established with the assistance of an external actuary. Such assumptions include an annual (nominal) discount rate of 6.09%, the expected increases in salaries and turnover rate, among others.

The total amount of actuarial liabilities accrued at year-end is presented in the item Non-current provisions for employee benefits.

2.19 Classification of current and non-current balances

In the accompanying Consolidated Interim Statement of Financial Position, the balances are classified according to their maturities, that is, those with maturities equal to or less than twelve months, and as non-current those with maturities greater than that period.

In the event that there are obligations whose maturity is less than twelve months, but whose long-term refinancing is assured and represents the intent of the Group and its subsidiaries through unconditionally available credit agreements with a long-term maturity, to refinance, they are classified as non-current liabilities.

2.20 Income and deferred taxes

Income tax expense for the year, is defined as the sum of current tax of the Company and its subsidiaries and results from the application of the tax rate on the tax base of the year, plus the change in assets and liabilities for deferred taxes and tax credits, both for tax loss carryforwards (to the extent realizable) as for deductible and taxable temporary differences.

Differences between the carrying amount of the assets and liabilities and their tax bases give rise to deferred tax assets and liabilities, which are measured at the tax rates that are expected to apply in the year when the asset is realized, or the liability is settled.

Income tax and changes in deferred tax assets and liabilities not arising from business combinations are recognized in profit and loss or net equity, depending on the origin of the underlying recorded item which generated the tax effect.

Deferred tax assets and tax credits are only recognized when it is considered probable that there will be sufficient future tax profits to recover the deductible temporary differences and make the tax credits realizable.

Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. In addition, a deferred tax liability is not recognized if the temporary difference arises from the initial recognition of goodwill.

The Company is taxed under the "Partially Integrated Regime", first category income tax rate of 27%.

2.21 Recognition of income and expenses

The Company and its subsidiaries consider as operating revenue, in addition to the services invoiced in the year, an estimate for the services provided pending of billing at the end of the year. In addition, the costs associated with such revenues have been duly included as operating costs.

The company and its subsidiaries recognize revenue from the following main sources:

- Transmission
- Revenue from sale of products and services
- Revenue from the construction of third-party facilities
- Interest income
- Revenue from maintenance of third-party facilities

The Company recognizes revenue when (or as) control over a good or service is transferred to the customer. Revenue is measured based on the consideration to which it is expected to be entitled for said transfer of control, excluding amounts collected on behalf of third parties.

(i) Transmission:

Revenues from power transmission services are recorded based on the effective billing of the year of consumption, plus an estimate of the services provided and not billed at the closing date of the year, in these contracts there is a performance obligation. Revenues for Transmission services are recognized over time.

(ii) Revenue from sale of products and services:

Revenue from the sale of materials and equipment is recognized when the significant risks and benefits of the goods have been transferred to the buyer, the performance obligation is satisfied when the control of the good has been transferred to the customer. The transfer of goods for the sale of products occurs at the point of sale, where the customer physically obtains the good and moment where billing also occurs. Revenues from the retail sale of products and services are recognized at a point in time.

Revenue is measured at the fair value of the payment received, excluding discounts, rebates and sales taxes.

(iii) Revenue from the construction of works to third parties:

The other works to third parties corresponds to electrical works that the entity constructs and are invoiced and/or charged in advance to third parties, other than government grants. These initially generate a liability and an equivalent account receivable. As the construction of the work progresses, the corresponding liability is reduced until the end of the construction. Revenues from the construction of works to third parties are recognized over time.

(iv) Interest income:

Interest income is accounted for considering the effective interest rate applicable to the principal pending amortization during the corresponding accrual period. Interest income is recognized over time.

(v) Revenue from maintenance of third-party facilities:

Revenue from maintenance of third-party facilities is recorded based on the actual billing for the consumption period, plus an estimate of the services provided but not billed as of the year-end closing date. Revenue from maintenance of third-party facilities are recognized at a point in time.

The Company and its subsidiaries determine the existence of significant financing components in its contracts, adjusting the value of the consideration, if applicable, to reflect the effects of the time value of money. However, the Company applies the practical solution provided by IFRS 15 and will not adjust the value of the promised consideration for the effects of a significant financing component if the Company expects, at the beginning of the contract, that the period elapsed between the payment and the transfer of goods or services to the customer is one year or less.

Given that the Company mainly recognizes revenue for the amount to which it is entitled to invoice, it has decided to apply the practical disclosure solution provided for in IFRS 15, by which it is not required to disclose the aggregate amount of the transaction price assigned to the obligations of unsatisfied (or partially unsatisfied) performance at the end of the reporting year.

2.22 Dividends

Dividends distributed to shareholders are recognized as a liability on an accrual basis at the end of the reporting year in the Consolidated Interim Financial Statements of the Company, based on the dividend policy agreed upon by the shareholders or as set forth in the by-laws, which to date corresponds to the statutory minimum dividend payments set forth in Article N°79 of Corporations Law No. 18.046. The Shareholders' Meeting has the power to change the amount of the dividend to be distributed, which does not necessarily apply for future years.

For the calculation of the distributable net earnings, the Company will not adjust "Profit (Loss) attributable to the Controlling Interests" in the Consolidated Interim Statement of Comprehensive Income. Given the above, the values of such item less accumulated losses, if any, will be used as a basis. The distributed dividends will be deducted from that result. The dividends will be charged to the income for the year. The IFRS first-time adoption adjustments will not be part of this calculation as long as they are not made.

2.23 Statement of cash flows

The cash flow statement reflects the changes in cash and cash equivalents during the year, calculated using the direct method. The following terms are used in the statements of cash flow:

- **Cash Flows:** Inflows and outflows of cash and cash equivalents, which are investments with a term of less than three months, and which are highly liquid and subject to an insignificant risk of change in value.
- **Operating Activities:** Are the activities related to the principal revenue-producing activities of the Company and its subsidiaries and other activities that are not investing or financing activities.
- **Investing Activities:** Are the activities related to the acquisition and disposal of long-term assets and other investments not included in cash and cash equivalents.

- *Financing Activities:* Are the activities that result in changes in the size and composition of equity and liabilities of a financial nature.

2.24 Reclassifications

For comparative purposes, some amounts have been reclassified in the Consolidated Interim Financial Statements as of June 30, 2023:

- From Other income to Operating revenue have been reclassified ThCLP\$10,096,888
- From Other expenses, by nature to Raw materials and consumables used have been reclassified ThCLP\$2,400,380.

2.25 New accounting pronouncements

a) The following Amendments to IFRS has been applied to these Consolidated Interim Financial Statements:

| Amendments to IFRS | Mandatory Effective Date |
|---|--|
| Classification of Liabilities as Current or Non-Current (Amendments to IAS 1) | Annual periods beginning on or after January 1, 2024 |
| Lease Liability in a Sale and Leaseback (Amendments to IFRS 16) | Annual periods beginning on or after January 1, 2024 |
| Non-current Liabilities with Covenants (Amendments to NIC 1) | Annual periods beginning on or after January 1, 2024 |
| Supplier Finance Arrangements (Amendments to IAS 7 and IFRS 7) | Annual periods beginning on or after January 1, 2024 |

The application of the amendments has not had a significant effect on the results reported in these Consolidated Interim Financial Statements, however, they could affect the accounting of future transactions or agreements.

b) Accounting pronouncements with effective application not yet in force:

As of the date of issuance of these Consolidated Interim Financial Statements, the following standards and amendments had been issued by the IASB but were not mandatory.

| New IFRS | Mandatory Effective Date |
|---|---|
| IFRS 18, Presentation and Disclosure in Financial Statements | Annual periods beginning on or after January 1, 2027. |
| IFRS 19, Subsidiaries without Public Accountability: Disclosures | Annual periods beginning on or after January 1, 2027. |
| Amendments to IFRS | Mandatory Effective Date |
| Lack of Exchangeability (Amendments to IAS 21) | Annual periods beginning on or after January 1, 2025. |
| Amendments to the SASB standards to enhance their international applicability | Annual periods beginning on or after January 1, 2025. |
| Amendments to the Classification and Measurement of Financial Instruments (Amendments to IFRS 9 and IFRS 7) | Annual periods beginning on or after January 1, 2026. |

The Company and its subsidiaries are evaluating the impact of the application of the standards and amendments.

3. Industry Regulation and Operation of the Electrical System

The Chilean electrical sector participates in the activities of generation, transportation and distribution of electrical energy, which are performed by private companies, with the government performing a regulatory, supervisory and complementary function. The above means that the companies make decisions about their investments, marketing of their services and the operation of their facilities; consequently, they are responsible for the quality of the service provided in each segment, as stipulated in the electrical sector's regulatory framework.

In systems with an installed capacity equal to or greater than 200 MW, the actors of the electricity sector operate in coordination, and this coordination is in charge of the National Electrical Coordinator ("CEN").

In Chile, the National Electrical System (SEN) covers the area between Arica and Chiloe. On the other hand, there are several medium-sized systems (SSMM) operated by vertically integrated companies (including the subsidiaries SAGESA

and Edelaysen), whose installed generation capacity is less than 200 MW, but greater than 1.500 KW, and which serve the consumption of the regions of Los Lagos, Aysén and Magallanes.

3.1 Generation of electricity

Generation of electricity is an activity characterized by free participation and no obligation to obtain concessions, except for the construction and operation of the hydroelectric power plants.

In Interconnected Systems such as the SEN there are three main markets that differ, both in the type of customers and in the type of rate applicable to each one.

- a) Large customer market: Corresponds to those customers with more than 5 MW installed power, which agree on the fee freely with the generator. Customers between 500kW and 5 MW may choose to be part of the free customers market or the regular market, and they are not allowed to change such tariff regime for 4 years.
- b) **Spot Market:** Segment in which generating companies participate when making transactions among themselves, either by means of energy contracts or through sales at marginal cost.
- c) Regulated customers market: Segment consisting of all the transfers of energy between generation and distribution companies to supply customers subject to price regulation (hereinafter, "regulated customers"). In this way, the distribution companies become customers of the generating companies.

The price at which these latter transactions are performed is obtained from open, transparent and non-discriminatory tendering, which currently is established for a minimum contract period of 20 years. It should be noted that the power purchase price of tenders are set at the level of core bars.

Regardless of the final market supplied by a generator, transfers between generating companies participating in the system are performed at the hourly incremental cost. The agency in charge of performing these calculations is the Market Administration of the CEN.

3.2 Transmission

Transmission systems are classified into three groups: National Transmission, Zonal Transmission and Dedicated Transmission, with the first two having open access and regulated tariffs.

In the case of dedicated transmission, access may be denied in the case of available technical capacity, and transportation charges are governed by private contracts between the parties, except for those destined to the supply of users subject to price regulation, in which case the charges must be consistent with the regulated prices.

The information about tolls is public in all cases. The collection system of the transmission companies is the sum of a toll charged to the generation companies and to the final users. This system allows the companies that own the transmission facilities to recover and remunerate their investments in transmission assets and collect the efficient costs associated with the operation of those assets. The amount of the transmission may be regulated by the Regulatory Authority, determined in Public Tenders, or by private contracts between the parties.

The CNE the process of tariffication 2024-2027 is beginning. On 11 April 2024 the CNE issued its final technical report of qualification of facilities to the transmission system for the period 2024-2027. SAESA group presented discrepancies to this report, which must be solved for the panel of experts. Once the decision has been issued shall start the tenders and the study, which should be awarded the second half of 2024.

3.3 Regulatory framework

3.3.1 General Aspects

The Chilean electricity industry is regulated since 1982, mainly by Decree with Force of Law No. 1/82, which contains the General Act on Electrical Services (referred to as "LGSE"), as well as by the overall regulation of said Act.

Since its enactment, several amendments have been performed to the Law, which had a positive impact on the sector by encouraging the level of investment and regulating the process of obtaining power purchase contracts by distributors to satisfy consumption. Next are listed the latest amendments carried out.

3.3.2 Transmission Law

On July 20, 2016, the new Transmission Law was published in the Official Gazette (Law No. 20.936) that establishes a New Electric Transmission System and creates an Independent Coordinating Agency of the National Electric System.

The main changes proposed by this Law are:

- a) Functional definition of the transmission: The "electricity transmission or transport system" is the set of electrical lines and substations that are part of an electrical system, and that are not intended to provide the public distribution service.
- b) Remuneration: It will be through unique charges that will ensure the recovery of the investment and the administration, operation and maintenance costs efficient and recognized in the tariff decrees. The current volatility is eliminated due to variations in electricity consumption. The recognized value for the 2018-2019 biennium of the existing transmission facilities was set through DS 6T/2018. As of January 2018, it ensures the income of the decree and eliminates the dependence on demand.

The valuation decree for period 2020-2023 is in the process of record by the Comptrollership, which has retroactive effect to January 2020. In addition, the valuation process for the 2024-2027 is beginning. Nothing more has happened as of March 2023 in the transmission area, the technical bases were the subject of discrepancy in the expert panel, which issued its dictum in December 2023.

- c) Total open access to installations of transmission systems of the electrical system and may be used by third parties under non-discriminatory technical and economic conditions among all users, through payment of the corresponding transmission system remuneration.
- d) Change in discount rates used to remunerate facility costs from a real annual fixed rate of 10% before taxes at a rate that considers the systematic risk of the companies' own activities in relation to the market, the rate risk free and the prize for market risk, with a floor of 7% real after tax.
- e) Strip Study: The State may establish that certain projects for new facilities may use this mechanism, which consists of delivering to the entity awarded the project a preliminary strip with the approval of the Council of Ministers for Sustainability, and the awarded entity must develop the specific layout within the preliminary strip and obtain the corresponding Resolution of Environmental Qualification for the project. Subsequently, easements are imposed by decree for the interest of the entire nation. With respect to the negotiation and payment of easements, the same current mechanisms are maintained.

3.3.3 Regulating, supervisory, and coordinating agencies

The Chilean electricity industry is regulated mainly by state agencies, including the National Commission of Energy (referred to as "CNE"), the Ministry of Energy, and the Superintendency of Electricity and Fuels (referred to as "SEC"), which perform regulatory, oversight and coordinating functions.

- a) National Energy Commission ("CNE", in Spanish): It is primarily responsible for the proper functioning and development of the national energy sector. Specifically, the CNE is responsible for designing industry standards and the calculation of rates. Additionally, it acts as a technical entity and informs the Panel of Experts when divergences arise among the members of the CEN or when there are differences in the processes of pricing, among other matters.
- b) Superintendence of Electricity and Fuels ("SEC", in Spanish): Decentralized agency in charge of monitoring and overseeing compliance with the laws, regulations and technical standards governing the generation, production, storage, transportation, and distribution of liquid fuels, gas and electricity. Additionally, it grants provisional concessions and verifies the quality of the services provided.

- c) Ministry of Energy: Institution created in 2010, in charge of establishing node prices, transmission and subtransmission usage charges, and distribution tariffs. In addition, it awards final concessions on the basis of a SEC report. The general objective of the Ministry of Energy is to elaborate and coordinate plans, policies and standards for the sector's proper functioning and development, to ensure compliance with them and to advise the Government on all matters related to energy.
- National Electric Coordinator ("CEN", in Spanish): Entity created in the Law on Transmission, who has the following d) functions:
 - To preserve the safety of the service; _
 - To guarantee the operation at minimum cost of all the facilities that make up the system;
 - To guarantee access to the transmission facilities to supply the final customers (distributors or free customers).

4. **Risk management policy**

4.1. **Risk Governance**

Grupo Saesa considers risk management as inherent to the management of its businesses. In this regard, it has practices, policies, and procedures that allow it to identify, monitor, manage, and mitigate them. This management is entrusted to the Manager of Strategic Planning, Management, and Risks, who reports quarterly to the board and is periodically monitored by the executive committee. This aims to mitigate risks that may impact the ability to achieve business objectives and create value over time.

Integrated Risk Management Framework 4.2.

Grupo Saesa has adopted its Integrated Risk Management Policy, which extends to all subsidiary companies and commits employees and other stakeholders to follow an Integrated Risk Management Framework in their operations. This framework is aligned with international standards ISO 31000 (2018, Risk Management) and the COSO II ERM 2017 methodology for integrating risk management.

4.3. **Objectives of Integrated Risk Management**

The key objectives of the Integrated Risk Management includes: facilitating the achievement of business objectives, minimizing the occurrence and impact of risks and potential losses, proactively managing risks, providing a comprehensive response to risks, maximizing the efficiency of investments in risk mitigation, incorporating risk management into strategic and budgetary planning, promoting a consistent approach to risk management throughout the subsidiary companies, and providing regular reporting to the Board and Executive Team on annually identified critical risks.

4.4. **Risk Matrix**

The coordination of the continuous monitoring and evaluation of risks within Grupo Saesa is undertaken by the Risk Department, which facilitates collaboration among the responsible parties for each process across different business segments. These responsible parties must identify risks, their sources and consequences, estimate their likelihood and economic impact (both inherent and residual) and determine necessary mitigation actions. This information is consolidated in a risk matrix, organizing risks according to an established taxonomy.

4.5. Identification of Strategic Critical Risks

Grupo Saesa categorizes the risks it faces, paying special attention to those considered critical to its Vision, Mission, and Strategic Business Planning. There is an internal risk management segmented into six subcategories: Strategic, Information Security, Compliance, Financial, Operational, and Occupational, under the supervision of a strategic entity responsible for ensuring the proper implementation of the risk management model.

This report specifically focuses on the financial risks identified by the company's Administration and Finance Management, for which specific management and mitigation policies have been established.

4.6. Financial Risks

Financial risks refer to the possibility of events occurring that could lead to negative financial consequences. In line with this, the company has defined a structure for managing financial risk, whose process is based on the identification, analysis, quantification, measurement, and control of each event that could impact the company's financial results.

The cash flows of the company and its subsidiaries are primarily generated by their participation in the electricity business, which has a stable and long-term profile.

4.6.1. Financial Risks

The Company could be affected by currency fluctuations as transactions are denominated in US dollars and Chilean pesos.

The Company conducts periodic reviews of its financial assets and liabilities and the potential impact of exchange rate fluctuations. In the event that the impact could be significant, the Company may enter into derivatives to mitigate the effects of these impacts in line with its hedging strategy.

Due to the nature of the business, the Company and its subsidiaries engages in transactions in currencies other than their functional currency, primarily payments for the purchase of materials or inputs associated with electric system projects that are traded in foreign markets, usually in US dollars. In case where these transactions, as well as significant financing transactions or other cash flows, could affect the results of the Company and its subsidiaries, the use of derivative instruments to hedge in some of these cases is evaluated.

Those subsidiaries with Chilean pesos as functional currency are exposed to US dollar exchange rate fluctuations since their revenues are US dollar-indexed given its monthly tariff structure.

Additionally, these subsidiaries are exposed to exchange rate fluctuations for certain foreign currency expenses, mainly in US dollars.

As of June 30, 2024, the Company and its subsidiaries does not hold forward derivative instruments.

As of June 30, 2024, the Company does not hold account receivable from related parties denominated in other than Chilean pesos.

Sensitivity Analysis

A comparative table for the periods 2024 and 2023, with the sensitivity analysis showing the impact on results for monetary accounts on balance sheets in currencies other than their functional currency (US dollar) for Sagesa S.A., STN, STC, SATT, and Cabo Leones S.A., in the event of a positive or negative variation of \$10 in the exchange rate, is shown below:

| | | | 06-30- | -2024 | 06-30-2023 | | |
|--|-----------------------------------|--------------------------------|-------------------------------|-------------------|--------------------|-------------------|--|
| Name Company | Balance Situation | Sensitivity Variance in F/E | Sensitivity Credit / (Charge) | | Credit / (Charge) | | |
| Name Company | balance situation | (±) | Appreciation CLP\$ | Devaluation CLP\$ | Appreciation CLP\$ | Devaluation CLP\$ | |
| | | | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ | |
| Sistema de Transmisión del Norte S.A. | Excess of assets over liabilities | \$10 | (176,231) | 176,231 | 45,958 | (45,958) | |
| Sistema de Transmisión del Centro S.A. | Excess of assets over liabilities | \$10 | (464,834) | 464,834 | 21,627 | (21,627) | |
| Sociedad Austral de Transmisión Troncal S.A. | Excess of assets over liabilities | \$10 | (1,567,500) | 1,567,500 | 50,235 | (50,235) | |
| Línea de Transmisión Cabo Leones S.A. | Excess of assets over liabilities | \$10 | (425,408) | 425,408 | 6,210 | (6,210) | |
| Total | | | (2,633,973) | 2,633,973 | 124,030 | (124,030) | |

4.6.2. Inflationary Risk

A relevant percentage of the company's revenues are denominated in Chilean pesos and use the local CPI as indexing parameter.

Regulated tariffs are established considering, where applicable, exchange rates (i.e., when supplies are primarily acquired in a particular currency) and the CPI in the United States or other countries. Additionally, in the case of unregulated customers, contracts may be denominated in Chilean UF.

On the other hand, the company holds a significant percentage of debt denominated in UF. However, the company's exposure is limited, as a large portion of revenues are indexed.

Sensitivity Analysis

The Company and its subsidiaries conducted a sensitivity analysis of the variation in UF for Other current and non-current financial liabilities (bank loans and bonds), assuming that all other variables remain constant. This methodology involves measuring, for the mentioned liabilities, the positive half-percentage point variation on an annual basis of the UF for the closing period of these Consolidated Interim Financial Statements, in comparison to the actual variation of the UF.

As a result of the analysis, according to the aforementioned condition, there is an increase in the company's liabilities of ThCLP\$ 281,789 as of June 30, 2024 (ThCLP\$ 270,671 as of June 30, 2023).

The impact on results for the indicated analysis for the periods 2024 and 2023 are shown below:

| | Total readjus | stable debt | | Effect in profit and loss | | |
|--------------------|---------------|-------------|---------------------------|---------------------------|------------|--|
| Debt type | 06-30-2024 | 06-30-2023 | Variance % increase UF | 06-30-2024 | 06-30-2023 | |
| | ThCLP\$ | ThCLP\$ | | ThCLP\$ | ThCLP\$ | |
| Debt in UF (bonds) | 113,365,949 | 108,094,139 | 0.5% | 281,789 | 270,671 | |

4.6.3. Inflationary Risk

Interest rate fluctuations could impact the future cash flows of assets and liabilities referenced to a variable interest rate, as well as affect the fair value of assets and liabilities referenced to a fixed interest rate.

The company continually assesses its debt structure, managing this risk primarily by focusing on financial liabilities. As of June 30, 2024, the Company maintains 100% of its financial debt referenced to a fixed interest rate.

There is an interest rate risk associated with the return on cash investments, which is explained by current market conditions mainly related to an eventual higher inflation and benchmark interest rates increasement, both domestic and foreign.

The company's management primarily invests cash in Money Market Funds with maturities of less than 30 days with daily redemption options and monitors daily rate movements affecting current yields. If necessary, the company's management could ask for early fund redemptions and then reinvests at market value.

4.6.4. Inflationary Risk

Financial resources are primarily obtained from own sources, financial debt, public and private offerings instruments and capital contributions, always maintaining stable structures and ensuring the optimization of the most suitable products in the market.

As of June 30, 2024, the Company's cash and cash equivalents amounted to ThCLP\$3,182,949 (ThCLP\$14,321,228 as of June 30, 2023).

Cash surpluses are invested solely in fixed-income instruments through national financial institutions with solid credit ratings, within established limits for each entity.

Additionally, the company has available credit lines totaling MThCLP\$99,345,000.

Furthermore, with the aim of maintaining liquidity reserves, the Parent Company has a signed a credit line contract for working capital purposes for a total amount of UF 1,000,000, available under any circumstances, and freely disposable until June 2024, with agreed maximum spreads. Through this contract, and considering the debt profile of its subsidiary companies, it can ensure compliance with its short and medium term obligations, minimizing liquidity risk.

As of June 30, 2024, 100% of the Group's debt is structured with long-term maturities, with annual and/or semi-annual debt service (mainly interest) lower than the estimated cash flows in conservative scenarios in order to avoid risks of short or long-term refinancing.

Maturity profile of principal and interest payments as of June 30, 2024, and December 31, 2023, is shown below:

The remained 87% are repayable after five years (related to bonds). As of June 30, 2024, and December 31, 2023, respectively.

4.6.5. Credit risk

The Company and its subsidiaries are exposed to credit risk due to their commercial and financial activities. Their policies aim to reduce counterparty default and additionally improve working capital position.

As the payment compliance of companies utilizing the transmission networks is overseen by the National Electric Coordinator, in the eventual case of non-payment, The Coordinator can suspend the operator. In the case of unregulated contracts, customers pay promptly as transmission suspension would affect their ability to deliver electricity.

Further information is available in Note 8 of Trade receivables and other receivables.

5. Judgments and estimates of Management in applying the entity's significant accounting policies

Company Management is responsible for the information contained in these Consolidated Interim Financial Statements.

The preparation of the accompanying Consolidated Interim Financial Statements requires the use of certain judgments, estimates and assumptions by Management that affect the reported amounts of revenues, expenses, assets and liabilities, the accompanying disclosures, and the disclosure of contingent liabilities at the date of the financial statements. Estimates and assumptions are continually evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

The following are the significant judgments, estimates and assumptions used by management in the preparation of these Consolidated Interim Financial Statements:

a) **Economic useful life of assets:** The useful life of property, plant and equipment that are used for the purpose of calculating depreciation is determined based on technical studies prepared by external and internal specialists. In addition, these studies are used for new acquisitions of property, plant and equipment, or when indicators exist that the useful lives of these assets should be changed.

These calculations require the use of estimates and assumptions such as technological change and expected term of operational availability of transmission assets. Changes in estimates are accounted for prospectively.

b) Impairment of assets: The Company reviews the book value of their tangible and intangible assets to determine if there is any indication that the book value cannot be recovered. If such an indication exists, the recoverable value of the asset is estimated to determine the extent of the impairment. In the impairment assessment, assets that do not generate independent cash flow are grouped into a Cash Generating Unit ("CGU") to which the asset belongs. The recoverable amount of these assets or CGU, is measured as the greater value between its fair value (the value in use) and its book value.

These assessments require the use of estimates and assumptions such as:

- Revenues from transmission tolls: The value of transmission tolls (of the Regulated and Non-Regulated Transmission Systems) in accordance with the rate decrees (or existing contracts) and the possible impact of the regulation.
- Investments in property, plant and equipment: The requirements of the new facilities to absorb the demand, as well as the regulatory requirements (example: Investment by Technical Standard) are considered in these projections. The Investment Plan is periodically updated to deal with the growth of the business.
- Fixed costs: Fixed costs are projected taking into account the current base, the growth of sales, customers and investments. Both in relation to staffing (considering salary adjustments and the Chilean CPI), as well as other operation and maintenance costs, and the projected level of inflation.
- Macroeconomic variables: The macroeconomic variables (inflation, exchange rate, among others) necessary to project the flows (sales rates and costs) are obtained from third-party reports.
- c) Revenues and operating costs: The Group considers as revenue, in addition to services billed in the period, an estimate for the services provided pending billing at the end of the period, considering that the metering is performed during the month according to a metering program. In addition, the costs associated with such revenues have been duly included as operating costs. It is also considered as part of the revenues and costs of the operation, the estimation of certain amounts of the Electricity System (among others, purchase and sale of energy and toll collection) that allow settlements between the different companies of the System for services already provided. These values will be reversed once the final settlements are issued by the responsible regulator and recorded in the general ledger.
- d) Litigation and contingencies: The final cost for claims and lawsuits could vary due to estimates based on different interpretations of the regulations, opinions and final evaluations of the amount of damages. Therefore, any change in the circumstances involved could have a significant effect on the amount of the provision recorded.

6. Cash and cash equivalents

a) The detail of this item as of June 30, 2024, and December 31, 2023, and 2022, is as follows:

| Cosh and cosh a wivelents | 06-30-2024 | 12-31-2023 |
|---------------------------------|------------|------------|
| Cash and cash equivalents | ThCLP\$ | ThCLP\$ |
| Cash on hand | 100 | 100 |
| Bank balances | 1,423,386 | 3,351,432 |
| Other fixed income instruments | 1,759,463 | 1,500,125 |
| Total cash and cash equivalents | 3,182,949 | 4,851,657 |

b) The detail of Other fixed income instruments is as follows:

| | | | | Currency | Risk classification | Investment amount | |
|---------------------------------------|---------------------|--|------------------------------|----------|------------------------|-------------------|------------|
| Company name | Abbreviated name | Financial institution name | Financial instrument name | | | 06-30-2024 | 12-31-2023 |
| | | | | | | ThCLP\$ | ThCLP\$ |
| Sociedad de Transmisión Austral S.A. | STA | Banco Estado S.A. Administradora General de Fondos | Mutual funds | CLP | AA+fm/M1 | - | 807,061 |
| Sistema de Transmisión del Norte S.A. | STN | Banco Estado S.A. Administradora General de Fondos | Mutual funds | CLP | AA+fm/M1 | 1,109,156 | 693,064 |
| Sagesa S.A. | SAGESA TX | Banco Estado S.A. Administradora General de Fondos | Mutual funds | CLP | AA+fm/M1 | 650,307 | - |
| Total Other fixed income instruments | | | | | | 1,759,463 | 1,500,125 |

Other fixed income instruments correspond to a portfolio of fixed income instruments, such as mutual funds, time deposits of less than three months from the date of the investment, which are taken out by the Company and its subsidiaries to maximize returns on cash surpluses, without exceeding the level of risk and maximum exposure as defined by Management.

These instruments are held to meet short-term payment commitments and they are easily convertible into given amounts of cash and are subject to a low risk of change in value. Such instruments accrue market interest for these types of operations and are not subject to restrictions.

c) The detail per currency type of the cash and cash equivalents is as follows:

| Detail of cash and cash equivalent | Currency | 06-30-2024 | 12-31-2023 |
|-------------------------------------|----------|------------|------------|
| Detail of Cash and Cash equivalent | currency | ThCLP\$ | ThCLP\$ |
| Amount of cash and cash equivalents | CLP | 2,864,399 | 2,545,280 |
| Amount of cash and cash equivalents | USD | 318,550 | 2,306,377 |
| Total Detail by type of currency | | 3,182,949 | 4,851,657 |

The following table details the changes in liabilities arising from financing activities of the Company, including those changes that represent cash flows and changes that do not represent cash flows as of June 30, 2024, and December 31, 2023:

| | | Cash flows | | | Changes other than cash | | | | | | | | |

The carrying value of trade and other receivables represents a reasonable approximation of their fair value.

8. Balances and Transactions with Related Parties

8.1. Shareholders

The detail of the Company's shareholders as of June 30, 2024, is as follows:

| Shareholders | Numbe | r of shares | Total | Ownership % | |
|-------------------------------------|-------------|--------------------|--------------------|--------------|--|
| | Series A | Series B | | Ownership // | |
| Inversiones Eléctricas del Sur S.A. | 371,662,703 | 38,327,579,739,556 | 38,327,951,402,259 | 99.969358% | |
| Inversiones Grupo Saesa Ltda. | 375,450 | 10,977,866,271 | 10,978,241,721 | 0.028634% | |
| Cóndor Holding SpA | 248,037,779 | - | 248,037,779 | 0.000647% | |
| Other non-controlling interests | 17,386 | 521,712,917 | 521,730,303 | 0.001361% | |
| Total | 620,093,318 | 38,339,079,318,744 | 38,339,699,412,062 | 100.00% | |

8.2. Balances and transactions with related parties

Transactions between the Company and its subsidiaries occur in the normal operations of its line of business both in terms of objective and the terms and conditions. These transactions have been eliminated in the process of consolidation and are not included in this note.

Among the main transactions between related companies include the purchase and sale of electricity and tolls. The prices of electricity in these operations are set by the authorities or by the market, and the tolls are controlled by the sector's regulatory framework.

The purchase and sale of materials is performed at average warehouse prices.

Inter-company loans are regulated within a framework of consolidated cash management, which falls mainly to the subsidiaries Saesa, Frontel and the Company, in charge of defining the optimal flows between related parties. Management has established that these loans will be due in a period of more than 12 months. Current account loans pay market interest. These loans have amount limits between companies, as indicated in the bond contracts, which are periodically monitored and have been fully complied with at the closing date of the Consolidated Interim Financial Statements (see note 27).

At the date of these Consolidated Interim Financial Statements, there are no guarantees furnished on the balances with related companies, or impairment provisions for them.

The balances of unconsolidated receivables and payables between the Company and its related companies are as follows:

a) Accounts receivable from related entities, current and non-current:

(*) As of December 31, 2022 Sistema de Transmisión del Sur S.A hold a current account loan with Inversiones Eléctricas del Sur S.A. destined to financing and the payment of its commitments for an amount of capital of ThUS\$6,820,352.- accruing a total amount of ThUS\$84,284.- in calculated interests with an anual interest rate not capitalizable of 12,02%.

As of January 1, 2023 the company has changed the conditions of the loans from pesos to UF calculated at the closing UF value 2022 for a total of ThUS\$194,251.25 UF.

As of June 30, 2024 the capital debt has been fully paid.

Parent Management has established that the enforceability of the loans will be greater than 12 months, accruing a monthly interest rate on the principal owed. The loan does not have guarantees, its conditions could change and it can be repaid in advance, in part or in its entirety, according to a previous decision of the Administration.

8.3. Board of Directors and Key Management Personnel

The Company and its subsidiaries are managed by a Board of Directors composed of eight members, who remain in office for a period of two years and may be re-elected.

On April 9, 2024, we learned of the resignation of Ms. Ashley Munroe from the Company's Board of Directors. Immediately afterwards, the Board of Directors proceeded to appoint Mr. Igor Romitelli as his replacement, until the next ordinary shareholders' meeting.

At the Company's Ordinary Shareholders' Meeting held on April 30, 2024, the Company's Board of Directors was renewed, electing Jorge Lesser García-Huidobro, Iván Díaz-Molina, Juan Ignacio Parot Becker, Luz Granier Bulnes, Stephen Best, Shama Naquashbandi, Igor Romitelli y Jonathan Reay as Directors for a period of two years.

At its meeting held on May 15, 2023, the Company's Board of Directors elected Mr. Jorge Lesser-García as Chairman of the Board and Mr. Iván Díaz-Molina as Vice Chairman.

As of June 30, 2024, the Board of Directors of the Company is composed of Mr. Iván Díaz – Molina, Jorge Lesser García – Huidobro, Juan Ignacio Parot Becker, Igor Romitelli, Jonathan Reay, Shama Naquashbandi, Stephen Best y Luz Granier.

a) Accounts receivable and payable and other transactions with the Board of Directors

As of June 30, 2024, and December 31, 2023, there are no pending balances payable between the Company and its respective Directors by concept of Directors' Compensation.

There are no balances payable or receivable pending with the Directors for other concepts.

b) Compensation of the Board of Directors

As stipulated in Article 33 of the Law on Corporations No. 18.046, the fees of the Board of Directors are set every year in the Company's Ordinary Shareholders' Meeting.

The Directors are not compensated for carrying out their roles.

The Directors Juan Ignacio Parot Becker, Igor Romitelli, Jonathan Reay, Shama Naquashbandi, Stephen Best and Luz Granier waived the remuneration that would correspond to them for the exercise of the position of Director of the Company. Only Directors Jorge Lesser García-Huidobro and Iván Díaz-Molina will receive their remuneration.

c) Compensation for key management personnel

The Company has no executive officers directly compensated by it.

9. Current Tax Assets and Liabilities

The details of current tax assets as of June 30, 2024, and December 31, 2023, are as follows:

| Current tax assets | 06-30-2024 | 12-31-2023 |
|--------------------------------------|------------|------------|
| Current tax assets | ThCLP\$ | ThCLP\$ |
| Recoverable income tax | 6,344,582 | 26,249,214 |
| Recoverable VAT credit, remanent (1) | 8,225,557 | 6,470,533 |
| Credit for absorbed earnings | - | 1,131,019 |
| Sence Credit | 104,216 | 190,190 |
| Recoverable tax previous year | 2,644,117 | 437,563 |
| Total | 17,318,472 | 34,478,519 |

(1) Corresponds mainly to VAT tax credit for construction of major works of the subsidiaries, SATT and STC.

The details of deferred tax liabilities as of June 30, 2024, and December 31, 2023, are as follows:

| Current tax liabilities | 06-30-2024 | 12-31-2023 | |
|-------------------------|------------|------------|--|
| | ThCLP\$ | ThCLP\$ | |
| Income tax | 467 | 309 | |
| VAT tax debit | 593,244 | 763,713 | |
| Other | 69,585 | 75,916 | |
| Total | 663,296 | 839,938 | |

10. Intangibles assets other than Goodwill

| Total movements | 846,729 | 764,876 | (86,146) | 1,525,459 |
| Closing balance at 12-31-2023 | 62,497,624 | 1,023,767 | 5,858,495 | 69,379,886 |

The easements and water rights are stated at cost and those acquired after the date of transition to historical costs. The period for exercising such rights generally has no expiration date, so they are considered to be assets with an indefinite useful life and, consequently, are not subject to amortization.

Software or computer programs and licenses are amortized using the straight-line method over 4 to 6 years. The amortization of these assets is presented in "Depreciation and Amortization Expenses" in the Statement of Comprehensive Income

Intangible assets associated with customer contracts of the Tolchén subsidiary are amortized on a straight-line basis over 25 years, according to the duration of the toll contracts.

During 2021, the increase in Intangible assets other than goodwill, is explained by the increase in identifiable intangible assets of (ThCLP\$6,233 million), caused by the valuation of the toll contracts included in the purchase of the company Tolchén.

In the purchase allocation process, the book values of Tolchén's assets and liabilities were reviewed, and intangible assets at fair value linked to contracts with wind farms, San Gabriel, Tolpán, El Alba and Los Olmos were identified.

11. Goodwill

The detail of goodwill as of June 30, 2024, and December 31, 2023, are as follows:

| Taxpayer ID | Company | 06-30-2024 | 12-31-2023 | |
|--------------|---------------------------------------|------------|------------|--|
| Τάλραγεί ΙΒ | Company | ThCLP\$ | ThCLP\$ | |
| 90.021.000-0 | Sociedad Austral de Electricidad S.A. | 64,000,000 | 64,000,000 | |
| 91.715.000-1 | Empresa Eléctrica de la Frontera S.A. | 2,109,123 | 2,109,123 | |
| 96.956.660-5 | Sociedad Austral de Electricidad S.A. | 7,883,969 | 7,883,969 | |
| 96.986.780-K | Empresa Eléctrica de la Frontera S.A. | 1,725,559 | 1,725,559 | |
| 77.122.643-4 | Tolchén Transmisión SpA | 1,270,069 | 1,179,663 | |
| Total | | 76,988,720 | 76,898,314 | |

Due to the requirements of Law No. 21.194, which seeks that distribution companies have an exclusive line of business, on December 31, 2020, when the distribution companies of Grupo Saesa, Sociedad Austral de Electricidad S.A. (Saesa S.A.) and Empresa Eléctrica de la Frontera S.A. (Frontel) were demerged and transferred their transmission assets to the new companies Saesa Transmission S.A. (STS) and Frontel Transmisión S.A. (Frontel TX), respectively, the purchased capital gains associated with the Transmission business were included in the demerge process.

- Sociedad Austral de Electricidad S.A. transferred the goodwill associated with the transmission assets in the demerge i. process. The subsidiary Sistema de Transmisión de Sur S.A. (formerly STS) has an assigned goodwill of ThCLP\$64.000.000 from the acquisition of Grupo Saesa (indirect parent company of Sociedad de Transmisión Austral S.A.) by OTTPP (Ontario Teachers' Pension Plan) and a part of the goodwill reassigned from Saesa S.A. for ThCLP\$2.109.123 associated with transmission assets.
- Empresa Eléctrica de la Frontera S.A. transferred in the split up process a part of the capital gain of Frontel S.A. ii. related to its transmission assets (ThCLP\$9.609.528).
 - The goodwill purchased related to Empresa Eléctrica de la Frontera S.A., Tax ID 96.956.660-5, by ThCLP\$7.883.969 corresponds to the excess paid arising from the purchase of the shares of that Company, carried out in 2001. Subsequently, the purchased Company was absorbed by its corresponding parent company, which came to have the same name as the absorbed Company, leaving the Goodwill.

The purchased goodwill recognized by Sociedad Empresa Eléctrica de la Frontera S.A., formerly Frontel, Tax ID 96.986.780-k, for ThCLP\$1.725.559 corresponds to the amount paid in excess of the fair value of the assets acquired through Inversiones Eléctricas del Sur Dos Ltda., in July 2008. Through a corporate restructuring, a

cascade effect of the purchased capital gains mentioned in the previous paragraph was generated, which was finally incorporated into the Company.

iii. The goodwill purchased related to Tolchén Transmisión SpA, Tax ID 77.122.643-4, corresponds to the amount paid in excess of the fair value of the assets acquired originating from the purchase of the shares made in July 2021.

In accordance with the estimates and projections available to the Company's Management, the projections of the cash flows attributable to the Cash Generating Units or groups of them to which the different capital gains are assigned allow their value to be recovered.

12. Property, plant and equipment

These are the balances of the item as of June 30, 2024, and December 31, 2023, are as follows:

The Company and its subsidiaries have maintained a policy of doing everything necessary to meet growing demand, preserve the condition of the facilities and adapt the system to technological improvements, with a view to complying with the standards of quality and continuity of the supply stipulated by current regulations.

Additional Information on Property, Plant and Equipment

- a) Depreciation of property, plant and equipment is presented in the item "Expenses for Depreciation and Amortization of Operating Income".
- **b)** The Company and its subsidiaries have risk insurance coverage for their property, plant and equipment (power stations, substations, constructions, contents and inventories), except for the power transmission lines and power grid. The above insurance coverage is effective for 12 to 14 months.
- c) The amount of property, plant and equipment fully depreciated as of June 30, 2024, and December 31, 2023, is not significant. The Company and its subsidiaries do not have any significant amount of assets not in service or withdrawn from active use.

13. Non-current assets or groups of assets for disposal classified as held for sale or as held for distribution to owners

In the context of the reorganization process being carried out by Saesa Group companies as a result of the enactment of Law No. 21.194 which amended the General Electrical Services Law, establishing a legal obligation of exclusive line of business for energy distribution companies. At the Group level, the actions described in note 1 have been carried out with the objective of complying with the legal obligation of exclusive business and grouping all the transmission companies of the Saesa Group as direct subsidiaries of STA, which meant that within the restructuring process the SGA and Sagesa companies that have the lines of Marketing and Generation had to be temporarily included respectively.

On September 27, 2021, the Company began an international bond placement process under rule 144A/REG-S in order to refinance all the intercompany debt held by the transmission companies and obtain financing for new projects. Considering the market conditions and the type of risk of the transmission business, the placement of this bond will be destined only to finance the transmission subsidiaries of STA, excluding the commercialization and generation businesses of SGA and Sagesa, which have not yet been divested.

According to the above, at the time of the placement of the Bond there was a formal commitment with the potential bondholders, where STA will divest itself of the subsidiaries SGA and Sagesa through a new restructuring process planned for the period 2022, It is for this reason that both subsidiaries have been reclassified and presented within the group of assets and liabilities held for distribution to owners as detailed in note 13.

a) The detail of the results of discontinued operations as of June 30, 2023, are as follows:

| STATEMENT OF COMPREHENSIVE INCOME | 01-01-2024 06-30-2024 | 01-01-2023 06-30-2023 | |

| Increase (decrease) due to exchange difference | 1,539,029 | 4,869,024 | 3,338,177 | 1,029,055 | |
| Total movements | 4,523,327 | 1,880,885 | 8,342,856 | 9,772,494 | |
| Final balance | 35,221,534 | 30,698,207 | 69,225,960 | 60,883,104 | |

Recovery of deferred tax asset balances depends on whether sufficient tax profits are obtained in the future. Management of the Company and subsidiaries considers that projections of future profits of the various companies making up the Group are sufficient to recover these assets.

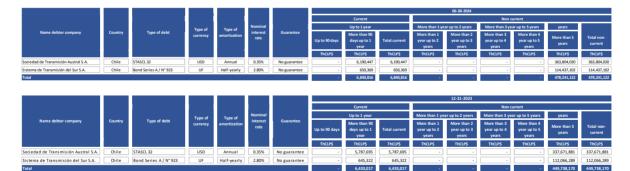

The Company and its subsidiaries are domiciled in Chile, so the local regulations in force apply equally to all of them.

15. Other financial assets and liabilities, current and no-current

a) The detail of current and non-current balances as of June 30, 2024, and December 31, 2023, are follows:

| | Curr | ent | Non current | |
|--|------------|------------|-------------|-------------|
| Other financial liabilities, current and non current | 06-30-2024 | 12-31-2023 | 06-30-2024 | 12-31-2023 |
| | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ |
| Bonds | 6,840,816 | 6,433,017 | 478,241,122 | 449,738,170 |
| Total | 6,840,816 | 6,433,017 | 478,241,122 | 449,738,170 |

b) The breakdown by currencies and maturities of the Obligations with the public Bonds as of June 30, 2024, and December 31, 2023, are as follows:

16. Trade and Other Accounts Payable

The details of this item as of as of June 30, 2024, and December 31, 2023, are as follows:

| | Curr | ent | Non current | | |
|---|------------|------------|-------------|------------|--|
| Trade accounts payable and other payables | 06-30-2024 | 12-31-2023 | 06-30-2024 | 12-31-2023 | |
| | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ | |
| Trade accounts payable | 55,455,251 | 69,784,129 | 20,634 | 20,634 | |

| Total trade and other accounts payables | 59,790,788 | 74,071,017 | 20,634 | 20,634 | |

17. Financial instruments

17.1. Financial instruments by category

By category, the assets and liabilities of financial instruments are as follows:

a) Financial assets

| | 06-30-2024 | | | | | |
|--|----------------------|--|------------|--|--|--|
| Financial assets | At amortized cost | At fair value with changes in income or loss | Total | | | |
| | ThCLP\$ | ThCLP\$ | ThCLP\$ | | | |
| Cash and cash equivalents | 1,423,486 | 1,759,463 | 3,182,949 | | | |
| Trade and other accounts receivable, current and non-current | 50,210,472 | - | 50,210,472 | | | |
| Due from related entities, current and non-current | 18,674,724 | - | 18,674,724 | | | |
| Other financial assets, non-current | 1,520,343 | - | 1,520,343 | | | |
| Total financial assets | 71,829,025 | 1,759,463 | 73,588,488 | | | |

| | 12-31-2023 | | | | |
|--|----------------------|--|------------|--|--|
| Financial assets | At amortized cost | At fair value with changes in income or loss | Total | | |
| | ThCLP\$ | ThCLP\$ | ThCLP\$ | | |
| Cash and cash equivalents | 3,351,532 | 1,500,125 | 4,851,657 | | |
| Trade and other accounts receivable, current and non-current | 35,734,817 | - | 35,734,817 | | |
| Due from related entities, current and non-current | 17,694,906 | - | 17,694,906 | | |
| Other financial assets, non-current | 1,206,477 | - | 1,206,477 | | |
| Total financial assets | 57,987,732 | 1,500,125 | 59,487,857 | | |

b) Financial liabilities

| | 06-30-2024 | | | |
|---|----------------------|-------------|--|--|
| Financial liabilities | At amortized cost | Total | | |
| | ThCLP\$ | ThCLP\$ | | |
| Other financial liabilities, current and non current | 485,081,938 | 485,081,938 | | |
| Lease liabilities, current and non-current | 2,716,967 | 2,716,967 | | |
| Trade and other accounts payable, current and non-current | 59,811,422 | 59,811,422 | | |
| Due to related entities, current and noncurrent | 109,752,142 | 109,752,142 | | |
| Total financial liabilities | 657,362,469 | 657,362,469 | | |

| | 12-31-2023 | | |
|---|----------------------|-------------|--|
| Financial liabilities | At amortized cost | Total | |
| | ThCLP\$ | ThCLP\$ | |
| Other financial liabilities, current and non current | 456,171,187 | 456,171,187 | |
| Lease liabilities, current and non-current | 2,306,899 | 2,306,899 | |
| Trade and other accounts payable, current and non-current | 74,091,651 | 74,091,651 | |
| Due to related entities, current and noncurrent | 92,447,784 | 92,447,784 | |
| Total financial liabilities | 625,017,521 | 625,017,521 | |

The accompanying notes are an integral part of these consolidated Interim financial statements. Page 49

17.2. Fair value of financial instruments

a) Fair value of financial instruments accounted for at amortized cost

The following summarizes the fair values of the main financial assets and liabilities, including those that are not presented at fair value in the Statement of Financial Position.

| | 06-30-2024 | | |
|--|----------------|------------|--|
| Financial assets | Carrying value | Fair value | |
| | ThCLP\$ | ThCLP\$ | |
| Investments held at amortized cost | | | |
| Cash on hand | 100 | 100 | |
| Bank balances | 1,423,386 | 1,423,386 | |
| Trade and other accounts receivable, current and non-current | 50,210,472 | 50,210,472 | |

| | 06-30-2024 | | |
|--|----------------|-------------|--|
| Financial liabilities | Carrying value | Fair value | |
| | ThCLP\$ | ThCLP\$ | |
| Financial liabilities held at amortized cost | | | |
| Other financial liabilities, current and non current (bonds) | 485,081,938 | 460,496,345 | |
| Lease liabilities, current and non-current | 2,716,967 | 2,716,967 | |
| Trade and other accounts payable, current and non-current | 59,811,422 | 59,811,422 | |

b) Methodology and assumptions used in the calculation of fair value

The fair value of financial assets and liabilities were determined using the following methodology:

- Trade accounts and other current accounts receivable, trade accounts payable and other accounts payable correspond to receivables mainly associated with energy sales and tolls, which have a short-term collection horizon, and on the other hand, they do not have a formal market where they are traded. Accordingly, valuation at cost or amortized cost is a good approximation of fair value.
- The fair value of the bonds and the bank was determined based on market price references, since these instruments are traded in the market under standard conditions and with a high degree of liquidity.

c) Recognition of Fair Value Measurements in the Consolidated Financial Statements:

Fair value hierarchy levels 1 to 3 are based on the degree to which the fair value is observable:

- Level 1: fair value measurements are those derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

18. Other Non-Financial Liabilities

The details of this item as of as of June 30, 2024, and December 31, 2023, are as follows:

| | Curi | ent | Non current | | |
|---------------------------------------|-----------------|------------|-------------|------------|--|
| Other non-financial liabilities | 06-30-2024 | 12-31-2023 | 06-30-2024 | 12-31-2023 | |

19. Equity

19.1. Net equity of the Company

19.1.1. Subscribed and Paid-in Capital

As of January 3, 2023, the issued capital of the Company amounts to ThCLP\$ 146,458,354. it was agreed to divide STA into two companies, one being the legal successor, which maintained the same corporate name, continuing with the electric power transmission business, and a new company, named "STA II S.A.," hereinafter referred to as (STA II). The capital is represented by 620.093.318 series A shares and 38.339.079.318.744 series B shares (all subscribed and paid).

As of December 31, 2022, the issued capital of the Company amounts to ThCLP\$166,064,578. The capital is represented by 620.093.318 series A shares (all subscribed and paid) and 38.352.069.948.752 series B shares, of which 12.990.630.008 are subscribed and pending payment (12.401.271.096 Grupo Saesa and 589.358.912 other non-controlling interest).

On December 28, 2021, at the Company's Extraordinary Shareholders' Meeting, it was agreed to increase the Company's capital for an amount of ThCLP\$106.292.019, through the issuance of 20.343.540.014.041 series B shares.

Capital increase was subscribed and paid by Inversiones Eléctricas del Sur S.A. through the total contribution of the shares owned by Sistema de Transmisión del Sur S.A. (STS).

The series A shares have all the rights that the current regulations confer on ordinary shares. On the other hand, series B shares have all the rights that current legislation confers on ordinary shares, but that have the preference to call meetings of shareholders (they will have the privilege of convening ordinary and extraordinary shareholders' meetings, when requested, at least, 5% of these shares) and the limitation to elect Directors (they will not have the right to elect Directors.

19.1.2. Other reserves

Total

The details of Other reserves as of June 30, 2024 and 2023, are as follows:

| Movements other reserves | Opening balance as of 01/01/2024 | Reserves for translation differences | Reserve for actuarial gains or losses in defined benefit plans | Other sundry reserves | Closing balance at 06-30-2024 |
|--|--|--|--|--------------------------|----------------------------------|
| | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ |
| Reserves for translation differences, net of deferred taxes | 11,380,825 | 5,259,072 | - | - | 16,639,897 |
| Reserves of actuarial gains or losses in defined benefit plans, net of deferred taxes | (371,467) | - | (90,963) | - | (462,430) |
| Other sundry reserves (*) | 126,378,973 | - | - | - | 126,378,973 |
| Total | 137,388,331 | 5,259,072 | (90,963) | - | 142,556,440 |
| Movements other reserves | Opening balance as of 01/01/2023 | Reserves for translation differences | Reserve for actuarial gains or losses in defined benefit plans | Other sundry reserves | Closing balance at 06-30-2023 |
| | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ |
| | | | | | THELF 9 |
| Reserves for translation differences, net of deferred taxes | 16,605,300 | (13,143,678) | - | - | 3,461,622 |
| Reserves for translation differences, net of deferred taxes Reserves of actuarial gains or losses in defined benefit plans, net of deferred taxes | 16,605,300 (134,330) | (13,143,678) | - (190,164) | - | |

On December 28, 2021, in the context of the reorganization process that the SAESA Group companies are carrying out as a result of the enactment of Law No. 21.194 that modified the General Electric Services Law, the Company carried out a capital increase through the exclusive issuance of new Series B shares. Said capital increase was subscribed and paid by Inversiones Eléctricas del Sur S.A. through the total contribution of the shares owned by Sistema de Transmisión del Sur S.A. (STS). Thus, the transfer of New STS shares from Eléctricas to STA was 10.078.417.668.726 shares distributed in 416.201.830 Series A shares and 10.078.001.466.896 Series B shares. Those that originated an adjustment in other reserves of ThCLP\$154.339.821. As it is an operation between related parties, the effects that originate must form part of the equity. Under this guideline, the company reclassified this effect in Other reserves.

151,393,324 (13,143,678) (190,164) (8,543,381) 129,516,101

(*) At the Extraordinary Shareholders' Meeting of the direct subsidiary Sociedad de Transmisión Austral S.A. (STA) held on January 3, 2023, it was agreed to divide STA into two companies, one being the legal successor, which maintained the same corporate name, continuing with the electric power transmission business, and a new company, named "STA II S.A.," hereinafter referred to as (STA II). As a result of the division, the latter was assigned the shares that STA held in Sagesa Generación S.A. and SGA. The division took effect starting January 3, 2023. The purpose of the division is to carry out certain separations of the segment, keeping the electric transmission in STA and the electric generation and commercialization businesses in STA II.

19.1.3. Translation Differences

The detail of the subsidiaries and related companies that present translation differences net of taxes as of June 30, 2024 and 2023 is as follows:

| Reserves for translation differences | | 06-30-2024 | 06-30-2023 |
|--|-------------|-------------|-------------|
| | | ThCLP\$ | ThCLP\$ |
| Sagesa S.A. | SAGESA TX | (15,559) | (417,681) |
| Sistema de Transmisión del Centro S.A. | STC | 7,274,230 | 1,322,046 |
| Sistema de Transmisión del Norte S.A. | STN | 9,144,972 | 2,895,746 |
| Sociedad Austral de Transmisión Troncal S.A. | SATT | 7,155,554 | 1,116,879 |
| Línea de Transmisión Cabo Leones S.A. | CABO LEONES | 1,558,858 | 135,698 |
| Sociedad de Transmisión Austral S.A. | STA | (9,042,251) | (1,588,334) |
| Tolchén Transmisión SpA | TOLCHÉN | 564,093 | (2,732) |
| Total Reserves for translation differences | | 16,639,897 | 3,461,622 |

The translation reserve comes from exchange differences that arise from the conversion of the subsidiary which have functional currency dollar.

19.1.4. Retained Earnings

The detail of Retained earnings as of June 30, 2024 and 2023 are as follows:

| Movement Retained earnings (Accumulated deficit) | Accumulated distributable net earnings | Total |
|---|--|--------------|
| | ThCLP\$ | ThCLP\$ |
| Opening balance as of 01-01-2024 | 23,988,156 | 23,988,156 |

| Negative | (13,528,035) | (188,370) | (494,578) | (2,499,239) |
| Profit (loss) from exchange differences | (13,049,219) | 9,779,244 | 9,894,392 | (2,463,383) |
| Total financial income (loss) | (22,944,375) | 2,761,287 | 5,226,429 | (6,826,231) |

25. **Guarantees Pledged to Third Parties**

Guarantees granted as of June 30, 2024, are as follows:

| | Com | mitted assets | | 2024 | 2025 | 2026 | 2027 |
|------------------------------|--------------------|---------------|------------|------------|-----------|---------|---------|
| Relationship | Turne of guarantee | Currency | Total | 2024 | 2025 | 2020 | 2027 |
| | Type of guarantee | currency | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ | ThCLP\$ |
| Guarantees construction work | Performance bond | CLP | 1,681,343 | 1,243,396 | 437,947 | - | - |
| Guarantees construction work | Performance bond | UF | 4,089,562 | 1,493,629 | 1,915,468 | 635,228 | 45,237 |
| Guarantees construction work | Performance bond | USD | 13,090,252 | 9,426,371 | 3,422,619 | 241,262 | - |
| Total | | | 18,861,157 | 12,163,396 | 5,776,034 | 876,490 | 45,237 |

26. **Sureties Obtained from Third Parties**

As of June 30, 2024, and 2023, the Company and its subsidiaries has received guarantees from clients, suppliers and contractors guaranteeing, primarily, performance under power supply contracts, works to be performed and advance payments for ThCLP\$ 31,353,903 and ThCLP\$ 17,273,394 respectively.

27. **Commitments and Restrictions**

Subsidiary STS's bond issue contracts impose obligations in addition to the payment obligations, including financial ratios of various types over the term of these contracts.

STS must report quarterly on compliance with these ratios. As of June 30, 2024, STS is in compliance with all the financial ratios required in those contracts and complies with the aforementioned covenants.

On January 10, 2019, STS subsidiary placed the Series A bonds, for a total amount of UF 4,000,000, with the following main restriction, maintain at the end of each quarter, a combined adjusted EBITDA / Net Financial Expenses not exceeding 6.75, which will be measured using the financial statements of the Company.

As of June 30, 2024, and December 31, 2023, the subsidiary STS complies with the covenants stipulated in their financial contracts.

STA bonds do not maintain any financial covenants.

28. Summarized Financial Information of the Subsidiaries that are part of the Company
